Secure and Convenient Cycle Parking Proposal in Support of Change Of Use Application on No.1 Woolram Wygate, Spalding, Lincs. PE11 1NU / Ref: H16-0437-15

Dear Tracey

In seeking to address the concerns that “Pedals” have raised in their comments, South Holland Community Church propose the following:

1 To provide, in the first instance, secure and convenient cycle parking and storage in the gravelled area along the north elevation of the building which will be by way of brackets bolted to the wall that cyclists will be able to secure their cycles to.

2 To take advice from South Holland District Council on providing further secure and convenient cycle parking, whilst at the same time not wishing to compromise any of the off road car parking spaces around the building that have already been designated and accounted for in the “Parking Proposal” document dated 8th July 2015.

3 To open up a dialogue with “Pedals” about actively promoting, encouraging and endorsing cycling within Spalding and South Holland.

Please let me know if any further information or clarification is required.

Thank you.

Yours sincerely

Pastor Kevin Taylor
