

Proposed Cycle Rack Storage at Wygate Park Spalding

1.0 Introduction

1.1 This statement has been prepared in order to comply with condition 7 and condition 11 of application number H16-0623-10 relating to the Kier Homes development site at Wygate Park Spalding. These conditions read as follows:

1.2 Condition 7 ' No dwelling shall be occupied until details of secure cycle storage facilities for each dwelling have been submitted to and approved in writing by the local planning authority. The agreed details shall be implemented for each dwelling prior to occupation and thereafter retained unless otherwise agreed in writing by the local planning authority'.

1.3 Condition 11. 'Prior to the first use of the areas of public open space, details of the design and positioning of secure cycle racks to serve the open space shall be submitted to and approved in writing by the district planning authority. The cycle racks so approved shall be provided before the areas of public open spaces are first brought into use and thereafter so maintained'.

2.0 Design of the cycle stands

2.1 The attached Odoni product guide shows the type of cycle rack storage currently envisaged for the development. The houses will each be provided with a hoop storage stand suitable for a wall or floor fixing.

2.2 As a result of feedback from 'Pedals' the open space areas will be provided with the Sheffield Stand providing accommodation for 2 cycles on each stand.

3.0 Location of the cycle stands

3.1 Each individual property will be provided with a cycle stand in the rear garden in a location best suited for that individual property. With regard to the Sheffield bicycle stands for the open space areas, these locations are shown on the landscape drawings 520/214/LD01 Rev A and 520/214/LD06 Rev A and are sufficient to provide 6 cycle spaces for each open space area.

4.0 Conclusion

4.1 This statement represents the proposed approach to the provision of cycle stands within the present development phase at Wygate Park both for private cycle parking as well as the open space cycle parking.

Kier Homes - 19 January 2012

Parking Products

Elwell Buildings Odoni Cycle Storage Equipment

Sturdy galvanised parking solutions

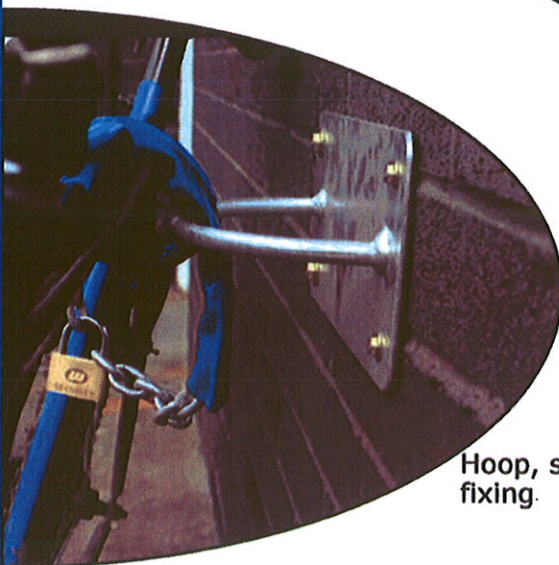

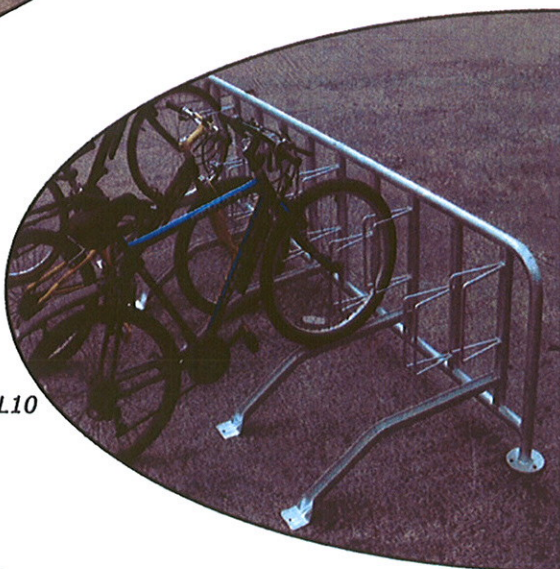

Floor mounted pillar stand

Model shown - DP1

High/Low riser cycle stand to maximise storage space.
Accommodate up to 10 cycles on a single stand.

Model shown: DPRL10

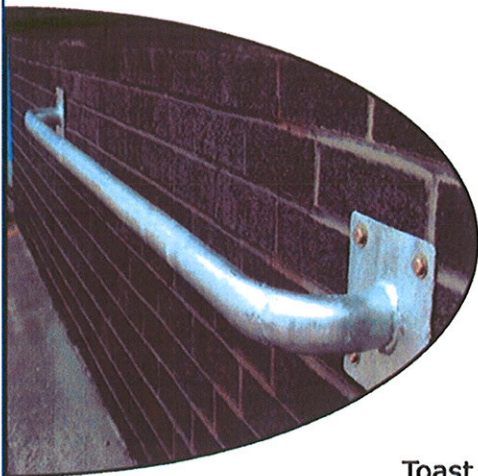

Hoop, suitable for wall or floor fixing.
