

Renewable Heat Incentive

Emissions Certificate

In order to accredit any biomass boiler or stove applications received for the domestic or non-domestic Renewable Heat Incentive (RHI) schemes, Ofgem must be satisfied that a valid emissions certificate exists for the specific model in the application (or alternatively for the non-domestic RHI, an environmental permit for the site). This template incorporates all information required to demonstrate that the tested plant meets the air quality requirements of the RHI. It must be fully completed and issued by a testing laboratory in order to be a valid certificate.

1. TEST HOUSE	
a) Name and address of the testing laboratory that has carried out the required tests and issued this certificate * <i>*if different, include details of both</i>	  HBLFA Francisco Josephinum BLT Wieselburg AT 3250 Wieselburg, Rottenhauser Straße blt@josephinum.at, http://blt.josephinum.at 
b) Name and signature of the person authorised by the testing laboratory to issue the certificate	Name: Heinrich PRANKL (For the test institute) Signature:  Name: Leopold LASSELSBERGER (For the factual correctness) Signature: 
c) Date of issue of this certificate, together with certificate reference number for this certificate <i>*Please see Note A</i>	Date: 20/02/2017 Certificate reference number: BLT 0050/17 Optional: reference number of original test report on which this certificate is based: Test report, approval no: 043/10 BLT reference number: 0375/16 BLT reference number: 0375/16 Test report, approval no: 013/16 BLT reference number: 0376/16 BLT reference number: 0376/16 Test report, approval no: 014/16
d) If the testing laboratory that has carried out the required tests is accredited to BS EN ISO/IEC 17025:2005, date of accreditation and accreditation number <i>(if testing conducted on or after 24 September 2013, the testing laboratory must be BS EN ISO/IEC 17025:2005 accredited at the time of testing)</i>	Date: 06/12/2016 Initial date of accreditation: 01/09/1998 Accreditation number: A 0112 Federal Ministry of Science, Research and Economy, Division I/12 – Accreditation Body

2.a PLANT - Please see Note B	Plant 1	Plant 2	Plant 3
a) Name of the plant tested	ETA PE-K 90	ETA PE-K 105	ETA PE-K 110
b) Model of the plant tested* <i>*Please ensure this is the same as in the manufacturer's documentation and boiler nameplate</i>	ETA PE-K 90	ETA PE-K 105	ETA PE-K 110
c) Manufacturer of the plant tested	ETA Heiztechnik GmbH Gewerbepark 1 AT 4716 Hofkirchen, Austria		
d) Installation capacity* of the tested plant in kilowatts (kW) <i>*The total installed peak heat output capacity</i>	95,0	105,0	110,0
e) Is the plant a <u>manually stoked, natural draught</u> plant? (without a fan providing forced or induced draught)	No	No	No
f) (i) Date the plant was tested* (ii) Please confirm that NOx and PM have been tested on the same occasion <i>*This is in reference to the emissions testing for PM and NOx, not any wider range of tests. A specific date is required. Please provide the date of test performed at $\geq 85\%$ of the installation capacity. If more than one model has been tested or testing has been conducted on different dates for different fuels, please list each date with details.</i>	16/09/2010 Yes	Family member	Family member
g) Please list all the plants in the type-testing range* of the tested plants to which the certificate applies, if any. ¹ Please include the installation capacity of each model. <i>*This must follow the ratio rules: If the smallest plant in the range is 500kW or less, the largest plant in the range can't be more than double the smallest. If the smallest plant in the range is over 500kW, the largest plant in the range can't be more than 500kW greater than the smallest.</i>	Wood pellets heating boiler ETA PE-K 90 ETA PE-K 105 ETA PE-K 110 ETA PE-K 140 ETA PE-K 180 ETA PE-K 199 ETA PE-K 220		

¹ The type-testing approach enables testing laboratories to provide assurance that all boilers in a given range meet the air quality requirements, without needing to specifically test each boiler.

2.b PLANT - Please see Note B	Plant 4	Plant 5	Plant 6
a) Name of the plant tested	ETA PE-K 140	ETA PE-K 180	ETA PE-K 199
b) Model of the plant tested* <i>*Please ensure this is the same as in the manufacturer's documentation and boiler nameplate</i>	ETA PE-K 140	ETA PE-K 180	ETA PE-K 199
c) Manufacturer of the plant tested	ETA Heiztechnik GmbH Gewerbepark 1 AT 4716 Hofkirchen, Austria		
d) Installation capacity* of the tested plant in kilowatts (kW) <i>*The total installed peak heat output capacity</i>	140,0	180,0	199,0
e) Is the plant a <u>manually stoked, natural draught</u> plant? (without a fan providing forced or induced draught)	No	No	No
f) (i) Date the plant was tested* (ii) Please confirm that NOx and PM have been tested on the same occasion <i>*This is in reference to the emissions testing for PM and NOx, not any wider range of tests. A specific date is required. Please provide the date of test performed at ≥85% of the installation capacity. If more than one model has been tested or testing has been conducted on different dates for different fuels, please list each date with details.</i>	10/08/2016 Yes	Family member	Family member
g) Please list all the plants in the type-testing range* of the tested plants to which the certificate applies, if any. ² Please include the installation capacity of each model. <i>*This must follow the ratio rules: If the smallest plant in the range is 500kW or less, the largest plant in the range can't be more than double the smallest. If the smallest plant in the range is over 500kW, the largest plant in the range can't be more than 500kW greater than the smallest.</i>	Wood pellets heating boiler ETA PE-K 90 ETA PE-K 105 ETA PE-K 110 ETA PE-K 140 ETA PE-K 180 ETA PE-K 199 ETA PE-K 220		

² The type-testing approach enables testing laboratories to provide assurance that all boilers in a given range meet the air quality requirements, without needing to specifically test each boiler.

2.c PLANT - Please see Note B	Plant 7		
a) Name of the plant tested	ETA PE-K 220		
b) Model of the plant tested* <i>*Please ensure this is the same as in the manufacturer's documentation and boiler nameplate</i>	ETA PE-K 220		
c) Manufacturer of the plant tested	ETA Heiztechnik GmbH Gewerbepark 1 AT 4716 Hofkirchen, Austria		
d) Installation capacity* of the tested plant in kilowatts (kW) <i>*The total installed peak heat output capacity</i>	220,0		
e) Is the plant a <u>manually stoked, natural draught</u> plant? (without a fan providing forced or induced draught)	No		
f) (i) Date the plant was tested* (ii) Please confirm that NO _x and PM have been tested on the same occasion <i>*This is in reference to the emissions testing for PM and NO_x, not any wider range of tests. A specific date is required. Please provide the date of test performed at ≥85% of the installation capacity. If more than one model has been tested or testing has been conducted on different dates for different fuels, please list each date with details.</i>	10/08/2016 Yes		
g) Please list all the plants in the type-testing range* of the tested plants to which the certificate applies, if any. ³ Please include the installation capacity of each model. <i>*This must follow the ratio rules: If the smallest plant in the range is 500kW or less, the largest plant in the range can't be more than double the smallest. If the smallest plant in the range is over 500kW, the largest plant in the range can't be more than 500kW greater than the smallest.</i>	Wood pellets heating boiler ETA PE-K 90 ETA PE-K 105 ETA PE-K 110 ETA PE-K 140 ETA PE-K 180 ETA PE-K 199 ETA PE-K 220		

³ The type-testing approach enables testing laboratories to provide assurance that all boilers in a given range meet the air quality requirements, without needing to specifically test each boiler.

3. FUELS

a) Types of fuels used when testing (where relevant, this should include how the fuel has been processed and based if relevant on classifications from EN14961 or EN303-5. eg. wood pellets/compressed wood, wood chip. We don't expect broader categories such as 'beech', 'wood'.)	Wood Pellets C1 according to EN 303-5
b) Based on the testing, list the range of fuels that can be used in compliance with the emission limits of 30 grams per gigajoule (g/GJ) net heat input for particulate matter (PM), and 150 g/GJ net heat input for oxides of nitrogen (NOx) (where relevant, this should include how the fuel has been processed and based if relevant on classifications from EN14961 or EN303-5. eg. wood pellets/compressed wood, wood chips. We don't expect broader categories such as 'beech', 'wood')	Wood Pellets C1 according to EN 303-5
b) Moisture content of the fuel used during testing Plant 1: ETA PE-K 90 Plant 4: ETA PE-K 140 Plant 7: ETA PE-K 220	6,5 % 6,6 – 6,8 % 6,7 – 7,0 %
d) Maximum allowable moisture content* of fuel that can be used with the certified plant(s) that ensures RHI emission limits are not exceeded. *This value may be obtained from ranges specified in EN 303-5 based on the fuel type(s) tested	≤ 12 % according to EN 303-5:1999

4. TESTS

Confirm which requirements the emissions of NOx and PM have been tested in accordance with. <u>Either 4a or 4b must be confirmed to be a valid RHI certificate.</u>	
a) Was the testing carried out in accordance* with all of the provisions relevant to emissions of PM and NOx in either BS EN 303-5:1999 or BS EN 303-5:2012? ⁴ *It is not a requirement that the tested plant must be within the scope of one of these standards, as long as the test lab can confirm that all of the relevant provisions were followed appropriately	EN 303-5:1999: Yes - ETA PE-K 90 (043/10) EN 303-5:2012: Yes - ETA PE-K 140 (013/16) - ETA PE-K 220 (014/16)
b) Was the testing carried out in accordance with <u>all</u> of the following requirements? (i) - EN 14792:2005 in respect of NOx emissions - EN 13284-1:2002 or ISO 9096:2003 in respect of PM emissions ³ (ii) emissions of PM represent the average of at least three measurements of emissions of PM, each of at least 30 minutes duration (iii) the value for NOx emissions is derived from the average of measurements made throughout the PM emission tests.	Yes

⁴ BS EN303-5:1999 and 2012 explain what should be measured and when.

³ These standards explain how to make the PM and NOx measurements.

c) Please confirm the plant was tested at $\geq 85\%$ of the installation capacity of the plant.	Yes
d) Please confirm the test shows that emissions from the plant were no greater than 30 g/GJ PM and 150 g/GJ NOx.	Yes
e) Measured* emissions of PM in g/GJ net heat input <i>*This average value should be from the test confirmed in 4c Results from partial load tests are not required. This value must be in the specified units.</i> Plant 1: ETA PE-K 90 Plant 2: ETA PE-K 105 (family member) Plant 3: ETA PE-K 110 (family member) Plant 4: ETA PE-K 140 Plant 5: ETA PE-K 180 (family member) Plant 6: ETA PE-K 199 (family member) Plant 7: ETA PE-K 220	8 g/GJ (nominal heat output) 8 g/GJ (nominal heat output) 8 g/GJ (nominal heat output) 8 g/GJ (nominal heat output) 9 g/GJ (nominal heat output) 9 g/GJ (nominal heat output) 9 g/GJ (nominal heat output)
f) Measured* emissions of NOx in g/GJ net heat input <i>*This average value should be from the test confirmed confirmed in 4c. Results from partial load tests are not required. This value must be in the specified units.</i> Plant 1: ETA PE-K 90 Plant 2: ETA PE-K 105 (family member) Plant 3: ETA PE-K 110 (family member) Plant 4: ETA PE-K 140 Plant 5: ETA PE-K 180 (family member) Plant 6: ETA PE-K 199 (family member) Plant 7: ETA PE-K 220	64 g/GJ (nominal heat output) 62 g/GJ (nominal heat output) 60 g/GJ (nominal heat output) 56 g/GJ (nominal heat output) 58 g/GJ (nominal heat output) 59 g/GJ (nominal heat output) 60 g/GJ (nominal heat output)

Note A: If details from a previously issued certificate or an original test report are being transferred to this RHI emission certificate template, please note that this document must be **issued by the testing laboratory** as a separate certificate. The issue date and certificate reference number should be in relation to *this* certificate produced using the RHI template, not the issue date and reference number of the original certificate or test report.

Note B: If you are including multiple tested plants on one certificate, please ensure that all sections are completed for each tested plant, and are laid out such that it is clear which details relate to which tested plant. If a type-testing range is included as well, please show clearly which type-testing range relates to which tested plant(s), following the type-testing range ratio rules outlined in 2g.
