I cannot support this application as the placement of a trailer at this site within the Spalding Conservation Area (SCA) would harm the character of a prominent, roadside location on a busy street within the SCA.
The description and images of the trailer and related additional paraphernalia provided suggest that they are not in keeping with the rest of the SCA and further exacerbate the site's detraction from the Character of the SCA. Additionally, I cannot see a public need for the siting of a catering facility at this location that outweighs the importance of preserving the character of the SCA, as there is already a wealth of food and drink establishments within close proximity of the proposed site.
The Case Officer may wish to consider a temporary permission, which may be more acceptable, so that the site would, in the future, be more readily available for development in a way which permanently enhances the Character of the SCA, but I cannot support permanent permission for the reasons listed above.
