Windows

Brilliant white

PVC-U has been developed over many decades to attain new standards in appearance, longer life and resistance to attack - by weather, sunlight and of course intruders. Our PVC-U has a technically advanced formulation with special ingredients designed to enhance even further its performance in extreme temperatures while the white profile stays bright throughout its long life.

Windows

- Each frame individually designed to include reinforcement where structural strength is required
- Excellent thermal, acoustic and drainage properties.
- A choice of glazing units for optimum thermal and sound insulation.
- A choice of internal or external glazing beads.

Once your choice is complete, let us guide you through the wide choice of handles and other door and window furniture available to complement the style of your home.

Picture this in harmony with specialist and ornamental glass varieties, stylish door panels that match the frames' stringent technical standards and hardware that is as functional as it is beautiful and you are picturing the very best in PVC-U windows, doors and conservatories.
