NOTES

1. Planting scheme to be implemented during the first available planting season from substantial completion of the development.
2. Planting areas are to be cleared of vegetation and treated with herbicide (glyphosate or similar approved) prior to planting and cultivated to form a suitable planting medium.
3. Plants to be strong, well rooted British nursery stock, evenly developed with a single well defined leader. Main stems shall be straight and will be furnished with lateral shoots or buds as appropriate.
4. Tree planting pits to be 600 x 600 x 600mm, and shrub planting pits to be 300 x 300 x 300mm. All planting pits to be backfilled with a 50-50 mix of topsoil and peat free planting compost with 50gm slow release fertiliser (25gm to shrubs) Enmag or similar, applied as a top dressing to each and every hole.
5. All trees and shrubs to be protected by bio-degradable spiral guards, and trees to be tied and staked where necessary. 600mm diameter area to be kept weed free around each tree and shrub. New trees and shrubs to be watered thoroughly during the May - October period after planting to prevent roots from drying out.
6. Species rich grassland to be left to grow long in some areas to be agreed, to be cut twice yearly. Log piles to be placed underplanted to the shrub areas to provide habitats for invertebrates and fungi.
