I am writing to object to the proposed demolition of Station House, Kings Road, Spalding. This is a hugely important part of the industrial heritage of Spalding, the Railway network was of immense importance to the Town of Spalding and this house is a poignant and important reminder of the past. The Towns Grade ll listed Station lies nearby and has recently undergone a £1.2million upgrade to restore it to its former glory. There is an active Station volunteers group committed to caring the Station and the Station House is an important part of the industrial heritage offer in that area. The house is over 130 years old, in very sound condition and amazingly is almost untouched with few alterations since it was built. If carefully restored by a sympathetic owner it could be a real asset to the heritage of our Town. As Heritage Champion at SHDC I am passionate about preserving our past and strongly object to the demolition of the house and the building of a block of flats in its place.
