DO NOT SCALE FROM THIS DRAWING

The planning of a research project may not be a linear process. Indeed, it is likely that the order in which the various steps are undertaken will change as the project develops. The following steps are intended to provide a guide to the planning of a research project and are not intended to be a checklist. The order in which the steps are undertaken may be different from the order in which they are presented. The steps are presented in a logical order, but the order in which they are undertaken may be different. The steps are presented in a logical order, but the order in which they are undertaken may be different. The steps are presented in a logical order, but the order in which they are undertaken may be different.
