forthcoming projects

Spalding, Lincolnshire - 15 retirement apartments.
Holmfirth - 12 town centre apartments.
Moorgate, Rotherham - 16 luxury apartments.
Barnsley Road, Sheffield 5 - 24 well located apartments.
Penistone Road, Hillsborough, Sheffield - high profile main road retail or office space c8,000 sq. ft.
Eckington - 16 retirement apartments centrally located.
Worksop - 42 retirement apartments in the town centre.
Sheffield Road, Dronfield - 11 retirement apartments in the old village.
Mortomley House, High Green, Sheffield - a mix of about 35, one and two bedroomed, apartments in a quiet, convenient position.

A number of the above scheduled projects have been completed by joint venture partnerships with established connections. Similarly, several of the proposed projects are to be 50/50 joint venture arrangements.

Jaguar Estates and group companies are South Yorkshire based real estate developers and investors. Since creation in the early 1990's, the business has grown into a substantial operation covering fields of both commercial and residential development across the north of England.

The main focus in recent years has been around niche markets in both industrial and housing sectors. Many schemes have been undertaken on a speculative basis with successful results being achieved through a combination of choice locations and specialised products to a high standard.

A wide range of residential projects has often featured select schemes of luxury apartments in excellent locations, several have involved careful refurbishment of quality derelict and listed buildings. Individual luxury dwellings are commissioned on appropriate sites. Bespoke design and build contracting has been undertaken for a prominent Housing Association where accommodation was required for the special needs sector. Our close relationship with established professional teams, contractors and trades, has facilitated excellent quality control on all projects and wide customer satisfaction.

Commercial schemes have been founded on perceived need in the market place, creating attractive buildings of a carefully specified size and configuration by using a carefully selected combination of design and materials.
