Proposal Installation of lifts to existing footbridge crossing and associated works to
provide inclusive access between Platform 1 and 2 at Spalding Station

It would appear that every care has been taken not to damage the integrity of the existing station buildings, and the lifts are necessary for access for disabled and heavily-laden passengers. We would hope that the opportunity would be taken to re-instate pedestrian access to the west of the station buildings at the same time. We would also hope that the lift chambers will be large enough to accommodate a bicycle, and that the lifts will be as vandal-proof as possible.
