Listed building consent is sought for the construction of new lifts and associated plant rooms on platform 1 and 2 connecting into the existing footbridge to provide step free access between platforms. The scheme includes relocation of the cycle parking on platform 1 and the removal of the span of bridge located beyond and attached to the western side of the stair building on platform 2.

The application is supported by a heritage statement which also considers the planning policy background and design and access issues.

Please let me know if you require any further information.

Yours faithfully
