Notes:

The necessary consent of all other interested parties should be obtained before the works proceed.

Major pruning works to yews should be carried out in May, although minor trimming works may be carried out in August or September. Avoid pruning in periods of frost. Always check if nesting birds are present before works are to be undertaken and, if present, delay until the fledglings have been reared and have flown the nest.

Avoid pruning horse chestnuts in the spring months directly prior to and immediately after bud opening as bleeding of sap from pruning cuts may be a problem. Ideally prune between leaf fall and February.

Under the Wildlife and Countryside Act 1981 (as amended) all birds, their nests and eggs are protected by law and it is an offence to damage or destroy the nest of any wild bird while it is in use or being built. In the event of query please contact Natural England on Tel: 03000 603900.

Bats are protected species under the Wildlife and Countryside Act 1981 (as amended) and in the event that bats are living in any cavities in the tree(s), or if they are discovered while the works are taking place, please inform Natural England on Tel: 03000 603900 before works proceed.
