CASE OFFICER ASSESSMENT

SITE DESCRIPTION

The site is located within the defined settlement limits of Spalding. The proposed canopy location is

located to the south of the main school building on rubber chippings, with school fields then established trees to the western boundary, and a 1.8 metre high timber fence to the south. Curtilage structures and a 1.8 metre high timber fence are located at the eastern boundary. The site is in Environment Agency Flood Zone 3 and is not subject to increased hazard or flood depth on the 2115 South Holland Strategic Flood Risk Mapping. Surface water on site is addressed by a pre-existing sustainable drainage system.

PROPOSAL

This is a full application at Monks House Primary School, Pennygate, Spalding for the installation of a codale conic waterproof canopy structure. The structure will be sited to the southern rear of the school, adjacent to other canopy structures, and measure 6 metres in width, 6 metres in depth, have a 2.3 metre eaves height and a 4.3 metre high ridge height. The steel framed canopy is galvanised and powder coated to Dusty Grey RAL7037 with an integral guttering system. The waterproof roof fabric material is PVC Poly 650 and is in the colour Moss Green RAL 6005.

A site visit was conducted on Friday 6th October 2023.

RELEVANT HISTORY

H16-0337-15

County Council Reg 3 - Proposed two classroom extension, new hall, remodelling of the existing accommodation with associated external works and increased parking - Approved - 20 May 2015.

CONSULTATION RESPONSES

Lincolnshire County Council - County Highways & SUDS

No objection - *"The erection and use of the proposed canopy would have no impact upon highway safety or network capacity and therefore, the highway authority does not wish to object to the grant of Consent for this Application."*

South Holland District Council - Environmental Protection

No comments.

Welland & Deepings Internal Drainage Board

No comments.

KEY PLANNING CONSIDERATIONS

The main issues and considerations in this case are (but are not limited to):

Principle of Development and Sustainability
Presumption in Favour
Layout, Design and Consideration of the Character and Appearance of the Area
Impact on Residential Amenity/Land Users
Parking/Highway Safety
Flooding Considerations/Drainage

EVALUATION

Section 38 (6) of the Town and Country Planning Act, as amended by the 2004 Act, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

In this case, the adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019, forms the development plan for the District, and is the basis for decision making in South Holland. The relevant development plan policies are detailed above.

The policies and provisions set out in the National Planning Policy Framework (updated September 2023) are also a material consideration in the determination of planning applications, alongside

adopted Supplementary Planning Documents.

Furthermore, where a Neighbourhood Plan has been adopted, this alongside the adopted Local Plan, forms part of the Development Plan for the District, and must be considered when assessing development proposals. In this instance, no relevant neighbourhood plans have been adopted.

Principle of Development and Sustainability

The South East Lincolnshire Local Plan sets out the settlement hierarchy in respect of delivering sustainable development that meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local housing need, whilst making more sustainable use of land and to minimise the loss of high-quality agricultural land by developing in sustainable locations and at appropriate densities.

Policy 1 of the South East Lincolnshire Local Plan sets out a spatial strategy for delivering sustainable development across South East Lincolnshire to 2036. Policy 1 (Spatial Strategy) expresses this sustainable framework of settlements, ranking the settlements deemed to be most sustainable in descending order. The most sustainable locations for development are situated within the 'Sub-Regional Centres', followed by 'Main Service Centres'. Lower down the hierarchy in respect of sustainable development are areas of limited development opportunity including Minor Service Centres, with areas of development constraint comprising 'Other Service Centres and Settlements'. The countryside is at the bottom of the settlement hierarchy and represents the least sustainable location in terms of sustainability.

The proposal is for development on school land for school purposes, located toward the centre of the site. The principle of the use has been established and would not alter as a result of the proposal. As such, the proposal is considered to be in accordance with the requirements of Policy 1 of the South East Lincolnshire Local Plan when viewed in principle. This is subject to the assessment against site specific criteria; including (but are not limited to) the impact of the proposal on the character or appearance of the area, impact on the residential amenities of neighbouring occupiers, and parking provision which are discussed in turn as follows.

Presumption in Favour

Paragraph 10 of the National Planning Policy Framework details that "so that sustainable development is pursued in a positive way, at the heart of the Framework is a presumption in favour of sustainable development (paragraph 11)".

Paragraph 11 expresses that for decision-taking this means: "c) approving development proposals that accord with an up-to-date development plan without delay; or d) where there are no relevant development plan policies, or the policies which are most important for determining the application are out-of-date, granting permission unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a clear reason for refusing the development proposed; or
ii. any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.

However, paragraph 12 of the National Planning Policy Framework reiterates that "The presumption in favour of sustainable development does not change the statutory status of the development plan as the starting point for decision-making".

Layout, Design and Consideration of the Character and Appearance of the Area

Section 12 of the National Planning Policy Framework (2023) specifically relates to 'Achieving well-designed places' and details that "The creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 130, contained within section 12 of the National Planning Policy Framework (2023), states that new development should function well and add to the overall quality of the area (including beyond the short term) and should be visually attractive as a result of good architecture and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality to enhance and reinforce good design characteristics, and that

decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing. Development proposals should also ensure that developments create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

Likewise, policy 2 of the South East Lincolnshire Local Plan outlines sustainable development considerations for development proposals, providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, policy 3 accords with the provisions of section 12 of the National Planning Policy Framework, in that it requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically-designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the National Planning Policy Framework and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable.

The design is in keeping with an existing canopy to the east and is not of a scale that impacts the overall character of the site nor the nearby residential properties. The steel framed canopy is galvanised and powder coated to Dusty Grey RAL7037 with an integral guttering system. The waterproof roof fabric material is PVC Poly 650 and is in the colour Moss Green RAL 6005. The proposed materials are considered to be appropriate for the site and proposed use.

Taking account of the design, scale and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with policies 2 and 3 of the South East Lincolnshire Local Plan and Section 12 of the National Planning Policy Framework.

Impact on Residential Amenity/Land Users

Paragraph 130 of the National Planning Policy Framework (2023) states that development should create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users; and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience.

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

The main building of the school is located to the north of the canopy, with recreational fields to the west. The nearest dwelling at Corinne Grove is 37 metres away to the east. The nearest dwelling to the south is 52 metres away on Abbots Way. The dwellings to the east and south are both separated from the site by an existing 1.8 metre high timber fence. Due the separation distances and boundary treatment there is not considered be an overlooking, overshadowing or any other amenity impact from the proposed canopy and use.

As detailed above, the scale and design of the proposal is considered to be such that there would be no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with the provisions of the Section 12 of the National Planning Policy Framework, and Policies 2 and 3 of the Local Plan.

Parking / Highway Safety

Section 9 of the National Planning Policy Framework (2023) specifically relates to 'Promoting sustainable transport'. Paragraph 111 of the National Planning Policy Framework (2023) advises that "development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network

would be severe".

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal.

Furthermore, Policy 36, to be read in conjunction with Appendix 6 of the South East Lincolnshire Local Plan, sets out minimum vehicle parking standards and requires at least two spaces for dwellings of up to three bedrooms and three spaces for dwellings with four or more bedrooms.

The proposal is located to the rear of the site and will not impact parking provision or vehicle manoeuvrability. Likewise, the propsoal would not result in a mark rise in vehicle movements.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Local Plan Policies 2, 3 and 36, and Section 9 of the National Planning Policy Framework.

Flooding Considerations / Drainage

The South East Lincolnshire Strategic Flood Risk Assessment (SFRA) provides an overview of how flood risk has been considered in shaping the proposals of the Local Plan; including the spatial strategy and the assessment of housing and employment sites. Policy 4 of the South East Lincolnshire Local Plan is clear in that "Development proposed within an area at risk of flooding (Flood Zones 2 and 3 of the Environment Agency's flood map or at risk during a breach or overtopping scenario as shown on the flood hazard and depths maps in the Strategic Flood Risk Assessment) will be permitted" in instances where specific criteria is met.

The site is in Environment Agency Flood Zone 3 and is not subject to increased hazard or flood depth on the 2115 South Holland Strategic Flood Risk Mapping. Surface water on site is addressed by a pre-existing sustainable drainage system. The proposal does not require raised floor levels and will not impact flood risk or drainage in the surrounding area.

PLANNING BALANCE

As detailed above, Section 38 (6) of the Town and Country Planning Act, as amended by the 2004 Act, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

By virtue of the scale, design, siting and proposed use of the canopy, there is not considered to be a material impact on the character or amenity of the surrounding area.

CONCLUSION

This application is considered to accord with Policies 1, 2 and 3 of the South East Lincolnshire Local Plan, 2019, as well as Section 12 of the National Planning Policy Framework, 2023.

RECOMMENDATION

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:
A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act
B. Advance equality of opportunity between people who share a protected characteristic and those

who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).
C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.
