# South Holland Health & Wellbeing Hub
# Indicative operational Waste Management Plan dated 21 May 2024

NB. This outline summary is indicative only. A specific plan will be developed with the venue operator as part of the upcoming operator contract award due to be completed December 2025.

| Type of Waste | Amount | Method | Frequency |
|---|---|---|---|
| Mixed dry recycling (plastic, cans etc) | At least once daily emptying of internal waste bins and bagging of recycling waste from users and visitors to the centre.<br>Minimal plastic waste produced directly.<br>External waste bins emptied 2-3 times weekly according to seasonal changes | Plastic bottles and cans, collected separately (rinsed and flattened where practicable). | Est. 3 x 1100l paladin bins emptied 1 x weekly |
| Paper & cardboard (dry) | Regular (weekly/monthly) deliveries of various materials and items packaged in cardboard boxes. | Cardboard boxes are dismantled and flattened | |
| Biowaste (Food) | Daily café and kitchen/servery food waste from small (est. 64 covers) café.<br><br>No cooking oil used | Specific biowaste recycling collection service will be contracted, if available locally.<br>Otherwise, food waste treated as general waste below | To be confirmed |
| General waste (other non-recyclable)<br>*Externally – to include dog pooh waste.* | At least once daily emptying of internal waste bins and bagging of general waste from users and visitors to the centre, including staff room.<br>External waste bins emptied 2-3 times weekly according to seasonal changes | Sufficient waste receptacles to be provided (internally and externally) to ensure adequate capacity for waste collection. | Bagged detritus placed in 1100l paladin bins<br>Est 3 x 1100l bins emptied 1 x weekly |
| Glass | No glass used/allowed in the centre | N/a | N/a |
| Empty Chemical Containers | 5l and 25l containers of chemical used for general and targeted cleaning, and pool water treatment.<br>Ordered as and when required to ensure minimum 1 week supply is maintained. | Empty containers are ‘returned’ when new deliveries are received. | As supply and delivery timescales dictate |
| Sanitary waste & nappies | Daily sanitary and nappy waste from users of the centre | Specialist waste receptacle contract in place for storage and collection | Nappy Bins collected 1 x weekly.<br>Sanitary bins collected 1 x monthly |
| Disused equipment, furniture and materials | Occasional need for disposal of broken or disused items. | Stored safely in small quantities | Occasional (less than annual) short-term skip hire from local recycling centre to deal with disposal. |
| Green waste | Seasonal (est fortnightly) cutting of external | Wasted collected and composted | Seasonal 1 x monthly |

| | | | |
|---|---|---|---|
| (grass cuttings, shrub, plant and tree trimmings) | grassed areas and (est. monthly) pruning. Seasonal trimmings and plant waste from Community Garden areas | on site, for community gardens, where practicable.<br>Green waste disposal service used where excess waste is generated. | |

Storage-

Once receptacles are emptied, all bagged general and recycling waste will be placed in the relevant external paladin bins for storage until collection for disposal.

Flattened cardboard will be placed directly in the dry recycling paladin bins for storage until collection for onward disposal.

A dedicated bin store will be provided to the rear of the new extension. Paladin bins will be stored in here.
