Good Afternoon Mr Niland,

Further to your request earlier please see below information on the Private Wire Agreement relating to the above planning application.

The power generated by the proposed solar array will be utilised by the adjacent factory to support its move to renewable energy sources.

The array has been designed and specified to meet the Factories needs as closely as possible with modelled outputs from the array being compared to half hourly power information from the factory.

As part of this arrangement there is a requirement for very modest export allowance from the site for times where production could outstrip consumption (sunniest days in the summer usually). An export limit has already been agreed with the District Network Operator (DNO) to restrict any exports.

We hope the above makes clear the how the proposed solar array will operate but if you have any further questions please do not hesitate to contact me.

Kind regards,

Ben
