Large multi stem sycamore

This tree is a result of new growth of an old tree that had been previously taken down
The sycamore is large and had multiple stems which is next to Lawrence's house and a care home

1 stem is leaning at 40 degrees approximately toward the care home to the north east site of the boundary

This tree had a rot pocket at the bottom of the tree in between the stems at round level

We would suggest to remove the whole tree before it causes a problem

Minor failures in the past.

The sycamore is at high risk to wind damage

Thank you
Terry & millie
