where the β parameters are to be estimated. It is a least-squares regression in which the β parameters are estimated by minimizing the sum of the squares of the residuals. The Generalized Composite β is chosen as the estimator of the β parameters that minimizes the sum of the squares of the residuals. The Generalized Composite β is chosen as the estimator of the β parameters that minimizes the sum of the squares of the residuals. The Generalized Composite β is chosen as the estimator of the β parameters that minimizes the sum of the squares of the residuals.
