1m high wall to rear of delivery area.

Broxap Heavy duty security bollards to rear of delivery area ref BX14 037-RT 1200mm high. at 1.5m c/c

2.8m high screen wall with acoustic lining.

Drainage to be worked out upon receipt of information from Anglian Water Authority

Broxap manual telescopic posts to boundary line ref BXBT/SST/114/900 900mm high at 1.5m c/c

Example of the type of shelter to be installed above customer / staff cycle parking area

Designated cycle storage area for staff and customers; 7.nr Sheffield cycle stands for 7.nr cycles. Shelter as photograph.

Pedestrian access/crossing min. 1400mm wide.

Following the excavation of the former fuel storage tanks, it is proposed to reinstate ground levels using an appropriately graded granular material.
Where the former tank excavation extends beneath proposed parking / loading areas, it is recommend that the granular material is placed and compacted in engineered layers, 'benched' into the sides of the excavation. Where appropriately placed and compacted granular fill materials are present beneath the proposed parking / loading areas, it is considered that a CBR value of 20% can be assumed for design.

Construct low gradient ramp up to store entrance to ensure level threshold between store and external pavement.
