

General Notes

1. All dimensions are in mm unless stated otherwise.
2. Contractor shall check all the dimensions on site and report any discrepancies immediately.
3. Drawings shall not be scaled.
4. Architecture drawings are indicative only and should not be used for any structural purpose. Structural Engineer to undertake separate site surveys as basis for structural design and calculations. Any Structural details provided in the drawings (eg: removal of wall sections, provision of new beams, columns, foundations, etc.) are based on limited site survey and certain assumptions. This drawing is to be read in conjunction with structural engineer's drawings and specifications where applicable. Refer to Structural Engineer's drawings for details and positions of beams, posts, foundations and other structural details.
5. Wherever structural specifications are repeated, details and specifications provided by structural engineers overrides the information provided in these notes. Before commencing site work and in particular any demolition, the contractor shall ensure validity of all assumptions and adequacy of structural designs provided.
6. The contractor shall propose all the planned variations from these and get them approved before the building work commences. All work to be approved by the Building Controls Approved Inspector.
