This message originated from outside your organization

Dear Polly,

Please see explanation to my application regarding erection of barn and 3 garages.

Barn – as it already has been said, it will be used to keep front loader, forklift, ride on lawn mower, car trailers (2 purchased in last month) and also for a minor repairs like change of bulbs in HGV or replace windscreen as companies doing that in customer premises anyway, but when weather is bad I need to rebook service as they are unable to do so as it need to be done in dry conditions. No any other major repair will be done on site as we are contacted with maintenance provider in Spalding/Pinchbeck.

Garage 1- will be used as a home gym, the amount of equipment that I have got now is big and I would like to keep it in one place. At the moment some of them is at home taking one room and in the garage next to the home. And I wish to use this part of my land to create home gym and free some space at home. I would like to add that I have four children, please understand that taking them all for physical exercises is difficult and all want to go somewhere. I wish to create gym for myself and balance beams, trampoline, high ropes and football net for them.

Garage 2 – Art studio. I love art, all kind but painting the most. Again there is no space at home to put painting equipment and place an object to be painted. Painting requires calmness and concentration so as far from home then better. I want to add that back in Poland I took part in competitions with some high places. It is hobby only at the moment, my dream is to have art exhibition one day.

Garage 3 – storing and grinding wood/planks. Maybe my explanation wasn't correct, I need space to produce wooden frames for my art. Grinder and sander will be used to smooth surface of planks. As pollen is produced from planks so can not be done in one room where I will be painting.

Application has been amended, however is a bit confusing for me, can you advise it is acceptable now?

Please see attached plan in red lines.

Also please let me know if there is anything else what I need to provide.

Regards
