Hi Tracey

With regard to the query raised by Highways re the above Planning Application I would like to say that there will not be any significant increase in traffic to the site. This Spring we have demolished several old buildings that were unfit for continued use to be replaced by the proposed modern more efficient store. There will not be continuous daily traffic to the site only for a short period at harvest time when loading into the store and again when the produce is loaded out which has always been the same for the site.
We have also concreted the yard to improve the surface.

I hope this answers your question.

Kind regards

John Grant
John Grant (Donington)
