Hi Lucy,

I have spoken to Rob and they intend to use sleepers for only the retaining wall part with feather board fencing above. The style of sleepers intend are Tanalised Green Softwood Sleeper as in the link below: https://www.turnbullsonline.co.uk/building/timber-joinery/external-timber/tanalised-green-softwood-sleeper-2400-x-200-x-100mm.html

Kind Regards

Eimear

Is it known what sleepers will be utilised at this stage? Some are more attractive than others, and a lot of sleepers look to be required if they go for the sleeper only option.
