CASE OFFICER ASSESSMENT

Description of Proposal

This is a householder application for extensions and alterations at Fairview, Birds Drove. A rear extension and roof modifications are proposed.

The rear extension would measure 5m (depth) by 3.45m (width). The proposal would have a pitched roof, set at eaves height 2.8m and ridge height 4.2m. It would infill a space between the existing rear element and the garage. Whilst this would physically connect the two structures, no internal link (e.g., door) would be created. The extension would be rendered in cream with a smooth finish. Black UPVC doors and windows, to match the existing, are proposed.

It is proposed that the existing flat roof rear element would be replaced with a mono-pitched roof. This roof would have planum clay interlocking tiles, in the "Rustic" colour. This existing rear element would also be rendered cream. The maximum height would be 3.6m.

Site Description

The site is outside of any of the settlement boundaries outlined within the South East Lincolnshire Local Plan, 2019, and as such can be considered to be within the countryside from a planning perspective. The site is located on the south side of a significant bend along Bird's Drove. The area has a clear agricultural character, interspersed with limited residential dwellings.

Fairview is a yellow brick, two-storey, 20th century house. The dwelling is within a reasonably large plot, with a large front garden. An agricultural holding is located immediately to its west. The site is listed within the Lincolnshire Heritage Explorer (which contains the public records of the Historic Environment Record (HER)) under reference MLI122599.

Relevant History

H17-0205-98 - Full - Proposed pitched roof to existing garage - Approved 09/04/98.

Consultation Responses

The responses received from consultees during the initial consultation exercises, which can be viewed in their entirety through the South Holland website, can be summarised as follows:

Conservation Officer

"We have no objection to this development on heritage grounds. The property sits on a redeveloped 19th century farmstead, though this represents more of an intangible heritage, which this proposal does not affect"

Further comments dated 16/10/25

"Our previous comment still stands. We have no objection to amendment 1."

Highway and Lead Local Flood Authority

No objections - "The Extension & Alterations will not increase the bedroom numbers; there will be no impact on parking or the access. The proposal will not have an adverse impact on the public highway."

Welland and Deepings Internal Drainage Board

"Further to receipt of the above, I confirm that Welland & Deepings IDB have no comment to make with regard to this application."

Surfleet Parish Council

Support - no comment

Historic Environment Officer

Initial comments

"Thank you for consulting us on this. Having reviewed the application documents and the updated available Historic Environment information for this application, the proposal is unlikely to have an impact on significant archaeological remains. Consequently, no further archaeological input is necessary for this application. It is not necessary to consult us on this application again, unless there are material changes to the proposals. However, if you would like advice from us, please contact us to explain your request"

Further comments

We reiterate our previous comments. Also, No objection to amendment 1

Public Representations

This application has been advertised in accordance with the Development Procedure Order and the Council's Statement of Community Involvement. In this instance, no letters of representation have been received.

Key Planning Considerations

Evaluation

Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019 (SELLP), is the development plan for the district, and is the basis for decision making in South Holland. The relevant development plan policies are detailed within the report above.

The policies and provisions set out in the National Planning Policy Framework, 2024 (NPPF) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Principle of Development

Policy 1 of the SELLP sets out the settlement hierarchy in respect of delivering sustainable development, which meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local need, whilst making more sustainable use of land, and to minimise the loss of high-quality agricultural plots by developing in sustainable locations and at appropriate densities.

Policy 1 expresses this sustainable hierarchy of settlements, ranking the settlements deemed to be most sustainable in descending order. The most sustainable locations for development are situated within the 'Sub-Regional Centres', followed by 'Main Service Centres'. Lower down the hierarchy are areas of limited development opportunity including Minor Service Centres, with areas of development constraint comprising 'Other Service Centres and Settlements'. The countryside is at the bottom of the settlement hierarchy and represents the least sustainable location.

The site is located outside of any of the settlement boundaries outlined in Policy 1, and so can be considered to be within the Countryside from a planning perspective. In this context, Policy 1 states:

"In the Countryside development will be permitted that is necessary to such a location and/or where it can be demonstrated that it meets the sustainable development needs of the area in terms of economic, community or environmental benefits".

The proposal solely relates to the extension of an existing and established residential dwelling and therefore, the principle of such development is considered to be appropriate.

As such, the proposal is considered to be in accordance with the requirements of the SELLP when viewed in principle. This is subject to the assessment against site specific criteria; including (but not limited to) the impact of the proposal on the character or appearance of the area, impact on the residential amenities of neighbouring occupiers, and impact on highway safety, which are discussed in turn in the following sections.

Layout, Design, Scale and Consideration of the Character of the Area

Section 12 of the NPPF, "Achieving well-designed places", states that the "creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within Section 12 of the NPPF, states that new development should function well and add to the overall quality of the area (including beyond the short term) and should be visually attractive as a result of good architecture and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality, to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing. Developments should create places that are safe, inclusive, and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Likewise, Policy 2 of the SELLP outlines sustainable development considerations for proposals; providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, Policy 3 of the SELLP requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the NPPF and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable. Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design, and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

The works would be located to the rear of the property, meaning that views from the public realm of the development would be limited. As a result, the impact upon the character of the area is reduced. The works are well integrated into the host, respecting existing proportions and features, to ensure the extension and alterations appear as natural additions. The loss of the flat roof, which is of little to no merit, can be considered an improvement.

The connection to the garage would increase the mass of the building; however, said increase would not be overly substantial. The resulting form would still be proportionate to the plot itself and respectful of the wider built form of the area.

The use of render is considered acceptable. The cream would complement the existing yellow brick well. In any event, the render would be located wholly to the rear, and so the impact would be lessened.

Taking account of the design, scale, and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with Policies 2 and 3 of the SELLP and Section 12 of the NPPF.

Impacts Upon Resident Amenity

Paragraph 135 of the NPPF states that development should create places that are safe, inclusive, and accessible and which promote health and well-being, with a high standard of amenity for

existing and future users.

Policies 2 and 3 of SELLP sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

Due to the relative isolation of the dwelling, there would be no overlooking or overshadowing.

As detailed above, the scale and design of the proposal is considered to have no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with Section 12 of the NPPF and Policies 2 and 3 of the Local Plan in terms of impact upon residential amenity.

Highway Safety and Parking

Section 9 of the NPPF is titled 'Promoting sustainable transport'. Within this, Paragraph 116 advises that "development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network, following mitigation, would be severe, taking into account all reasonable future scenarios".

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal. Policy 33 further reinforces the need for developments to be accessible via sustainable modes of transport.

Policy 36 of the SELLP, in conjunction with Appendix 6, sets out minimum vehicle parking standards and requires at least two spaces for dwellings of up to three bedrooms and three spaces for dwellings with four or more bedrooms.

The proposal would have no impact upon the highway network. No additional bedrooms would be created, and parking arrangements would not be impacted in anyway.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Policies 2, 3, 33 and 36 of the SELLP, as well as Section 9 of the NPPF.

Flooding Considerations

Section 14 of the NPPF requires development plans to "apply a sequential, risk-based approach to the location of development - taking into account all sources of flood risk and the current and future impacts of climate change - so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by: (...) applying the sequential test and then, if necessary, the exception test as set out below".

Paragraph 174 of the NPPF states "the aim of the sequential test is to steer new development to areas with the lowest risk of flooding from any source. Development should not be allocated or permitted if there are reasonably available sites appropriate for the proposed development in areas with a lower risk of flooding". The strategic flood risk assessment provides the basis for applying this test.

Paragraph 175 of the NPPF states that "the sequential test should be used in areas known to be at risk now or in the future from any form of flooding, except in situations where a site-specific flood risk assessment demonstrates that no built development within the site boundary, including access or escape routes, land raising or other potentially vulnerable elements, would be located on an area that would be at risk of flooding from any source, now and in the future (having regard to potential changes in flood risk)."

If, following the application of the Sequential Test, it is not possible, consistent with wider sustainability objectives, for the development to be located in zones with a lower probability of flooding, the Exceptions Test can be applied if appropriate. The process for applying the Exception Test is outlined within Paragraphs 177, 178 and 179 of the NPPF. Paragraph 178 states "to pass

the exception test it should be demonstrated that: a) the development would provide wider sustainability benefits to the community that outweigh the flood risk; and b) the development will be safe for its lifetime taking account of the vulnerability of its users, without increasing flood risk elsewhere, and, where possible, will reduce flood risk overall"

The site lies within Flood Zone 3 of the Environment Agency's Flood Maps. These have been created as a tool to raise awareness of flood risk with the public and partner organisations, such as Local Authorities, Emergency Services and Drainage Authorities. The Maps do not take into account any flood defences.

The South-East Lincolnshire Strategic Flood Risk Assessment (SFRA) provides an overview of how flood risk has been considered in shaping the proposals of the Local Plan, including the spatial strategy and the assessment of housing and employment sites. Policy 4 of the SELLP is clear in that "Development proposed within an area at risk of flooding (Flood Zones 2 and 3 of the Environment Agency's flood map or at risk during a breach or overtopping scenario as shown on the flood hazard and depths maps in the Strategic Flood Risk Assessment) will be permitted" in instances where specific criteria is met.

It is worth noting that large parts of the district of South Holland lie within Flood Zone 3. It is therefore necessary to use the refined flood risk information (Hazard and Depth maps) within the SFRA as a basis to apply the sequential test.

Within the SFRA the site is classed as danger for some, with a hazard depth of up to 0.5m.

Paragraph 176 of the NPPF states: "Applications for some minor development and changes of use should also not be subject to the sequential test, nor the exception test set out below". Footnote 62 clarifies that minor development includes householder development.

As such, there is no need to apply the sequential or exceptions test here. In any event, the small scale of the proposal would ensure it does not increase the risk of flooding elsewhere. The extension would be no more vulnerable to the impacts of flooding than the existing building.

Overall, when considering the development on balance, it is considered, given the mitigation measures detailed and recommended by condition, that the proposal accords with Policies 2, 3 and 4 of the SELLP and the intentions of the NPPF with regards to flood risk.

Heritage and Conservation

Policy 29 of the SELLP, alongside Section 16 of the NPPF, relates to the preservation of the historic environment. Both outline that all applications within the Conservation Area should preserve or enhance the setting.

The NPPF expresses the importance of considering the impact of development on the significance of designated heritage assets; advising that development and alterations to designated assets and their settings can cause harm. These policies ensure the protection and enhancement of the historic buildings and environments. Proposals that preserve those elements of the setting that make a positive contribution to or better reveal the significance should be treated favourably.

Section 16 of the NPPF states that "When considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation (and the more important the asset, the greater the weight should be). This is irrespective of whether any potential harm amounts to substantial harm, total loss or less than substantial harm to its significance".

Policy 29 (The Historic Environment) states amongst other matters that the distinctive elements of the South East Lincolnshire historic environment will be conserved and, where appropriate, enhanced, in keeping with the policies in the NPPF. Development proposals will be expected to conserve and enhance the character and appearance of designated and non-designated heritage assets, including archaeology, historic buildings, conservation areas, scheduled monuments, street patterns, streetscapes, landscapes, parks (including Registered Parks and Gardens), river frontages, structures and their settings through high-quality sensitive design.

As outlined above, the wider site is referenced within the HER. Typically, sites within the HER can be considered non-designated heritage assets.

Paragraph 216 of the NPPF states: "The effect of an application on the significance of a non-designated heritage asset should be taken into account in determining the application. In weighing applications that directly or indirectly affect non-designated heritage assets, a balanced judgement will be required having regard to the scale of any harm or loss and the significance of the heritage asset."

The description within the HER appears to relate more to the older features of the site (such as the existing brick barns and the previous dwellinghouse which is no longer present on this site). The dwelling itself is a relatively modern feature which is not itself mentioned in the HER. On this basis, it is considered that the works would have no harm upon the non-designated heritage asset. Therefore, the proposal would conform to Section 16 of the NPPF.

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development within the defined settlement boundary. The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents, and provides adequate parking, whilst conforming with the SELLP and the provisions of the NPPF when viewed as a whole.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:

- A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act
- B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).
- C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based

on the considerations set out in this report.

Conclusion

Taking these factors into consideration, the proposal is considered to comply with Policies 1, 2, 3, 4, 29, 33 and 36 of the SELLP, as well as Sections 9, 12, 14 and 16 of the NPPF. There are no significant factors in this case that would outweigh the benefits of the proposal; therefore, the planning balance is in favour of the proposal.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
