Job No. 2403

1. Introduction

This Design & Access Statement accompanies an outline planning application to develop this site for residential purposes.

It should be read in conjunction with Drawing No. 2403-01 & 2403-02-A

This DAS has been written to meet the requirements of Article 4C of the Town & Country Planning (General Development Procedure) Order 1995 (as amended)

When preparing this application, the following policies have been considered: -

NATIONAL PLANNING POLICY FRAMEWORK 2021

SOUTHEAST LINCOLNSHIRE LOCAL PLAN ADOPTED MARCH 2019

One of the requirements for the Southeast Lincolnshire Local Plan seeks the development of the 'Other Service Centres and Settlements' the inset map No 23 for Surfleet indicates that the application site is situated within the identified development boundary of a 'Minor Service Centre'.

An assessment of settlements and their sustainability credentials in the Southeast Lincolnshire Local Plan identifies Surfleet being a sustainable location for future development.

2. The Site

The Residential site has an area of 0.037 Ha. plus 0.36 Ha. for Biodiversity Measures and is between 70 & 80 Seas End Road Surfleet. The site is to be accessed directly off Seas End Road Road via a new access in constructed in accordance with L.C.C. Highways Standards The access position will provide good visibility in both directions It lies in close proximity to Surfleet General Store & Post Office; it is in reasonable proximity to Primary School also within easy walking distance to the services and employment facilities locally. There is regular public transport to Spalding where the public transport services expand further afield thus adding to the availability of services and employment facilities. The site currently consists of an unused field access. The Site is Flood Zone 3 as shown on the Environment Agency Flood mapping.

3. Use

The application site currently consists of an unused access to an agricultural field to the rear.

4. Amount

Drawing no. 2403-01 indicates the 1:1250 scale application site and where it is in relation to adjacent dwellings in that part of Surfleet. The 1:200 Existing Block Plan gives the layout of the site together with existing ground levels. Drawing no. 2403-02-A, the 1:200 Proposed Block Plan gives proposed ground levels and also details of boundary treatments

5. Appearance

Any proposed dwelling would be designed to be of high quality and of a type that is in character with the area in general. The dwellings to the North-East and South-West are two storey brick-built houses, therefore any proposed dwelling should also be a two storey. These details will be subject to a further submission. In terms of appearance, it will be of paramount importance that the design and form protects the amenities of the surrounding residential dwellings to minimise overlooking and noise etc.

6. Access

Proposed drives will be gravel on hardcore construction. Any garage will be set back a minimum of 13.0m from the edge of the carriageway to allow for turning space within the site to allow egress of vehicles in a forward gear.

7. Landscaping

The 1:200 Block Plans indicate the positions of the existing Boundary hedging and fences. Any additional landscaping will be illustrated within the Biodiversity Net Gains report and at the reserved matters stage.

8. Conclusion

An assessment of settlements and their sustainability credentials adopted in March 2019 the Southeast Lincolnshire Local Plan identifies Surfleet as a Minor service centre and a sustainable location for future development. The plan also determines that this site, being for a single Dwelling, should be suitable for Market Housing only and that no affordable housing would be required.

The National Planning Policy Framework clearly states the policies and how there is a presumption in favour of sustainable development and how the housing supply needs to be increased.

The application site is within close proximity a bus route and to schools, shops and other facilities as previously described.

The proposed scheme will be a positive contribution to the character of the area, particularly in terms of the design, form and scale and will also be a positive contribution to the street scene. The proposal will be of a very high quality in terms of design and the use of materials. Para 55 of the NPPF refers to promoting sustainable development, which will enhance and maintain the vitality of rural communities within groups of smaller settlements. It also advises avoiding new isolated homes in the countryside unless there are special circumstances, which includes exceptional quality or innovative nature of design. It is intended that the design will help raise standards of design in architecture and will enhance its immediate setting.

Whilst the NPPF suggests the LPA policies are out of date in the Strategic and General policies the LPA states that "in towns, villages and in the open countryside the effective use of land and buildings is of great importance".

The National Planning Policy Framework sets out the Government's policies and how they expect them to be applied. There is a presumption in favour of sustainable development and more importantly one of its main aims is to increase the supply of housing.

Para 49 of the Framework states "Relevant policies for the supply of housing should not be considered up to date if the Local Planning Authority cannot demonstrate a five-year upper supply of deliverable housing sites" thus as the authority is unable to demonstrate this the policies for the supply of housing such as the Local Plan policies HS7 and SG4 seeking to restrict development in the countryside are to be considered out of date. The proposal would be a positive contribution to the existing housing shortfall.

Policy SG7 refers to the requirement of properties to be energy efficient.

The Government is also greatly concerned due to the shortfall in housing numbers, in particular South Holland and its district not meeting its housing needs.

In view of the above it is hoped that this application will be favorably considered.
