Amendments:

While preparing the working drawings for Building Regulation approval, I found, there were a number of elements of the original Planning Approval design that did not meet the requirements of elements of the Building Regulations. The first being the ratio of external openings to floor area and secondly the stability criteria for openings in walls. I thus corrected these deficiencies before submitting the working drawings for Building Regulation approval. I denote these amendments with 'BR'. The other elements of amendment are a desire for increased utility from the design and, hopefully an increase in the aesthetics of the overall look.

1:	AnnexeRHE.	Add 0.5m return to Annexe, against house. Move Back Door to open onto hardstanding.
2:	AnnexeRHE.	Consolidate two windows into one larger window.'BR'
3:	AnnexeLHE.	Increase width of central pier, on walkway.'BR'
4:	Conservatory rear.	Swap position of door and window.
5:	Conservatory side.	Reduce size of french doors to 1.8m.'BR'
6:	Front Door.	Front door position corrected.
7:	Garage.	Rotation of garage footprint by 30deg approx.
8:	Garage.	Rotation of garage roof by 90deg.
9:	Garage.	Move rear window to south side.'BR'
