I have reviewed the Stuart Guy Consulting 'Stage One Environmental Desk Study of land adjacent to 41 Kenzie Drive, Sutton Bridge, PE12 9SW' dated 31st January 2020 report no. 20-01-01. The report does not include a study of historical mapping, relying instead on a database report. Historical mapping is freely available on line, and in this instance shows that the site has along history as a nursery with greenhouses on site. No information is given regarding the nursery, whether the greenhouses were heated and if so what the fuel source was. On that basis I consider that at least some basic site investigation is warranted at this location to rule out made ground soil and waste disposal.
