Subject: Planning Permission H18-0102-13 - Condition 4
Attachments: H18-0102-13-H18-0102-13_V1216400729052013_3DECN.pdf; H18-0102-13-H18-0102-13_V1215400128022013_1SL.pdf

Dear Louise,

I hope this email finds you well.

I just wanted to raise this matter following conversation with Caroline Budd at Wessex Archaeology. This relates to planning permission H18-0102-13 (copy attached) granted in May 2013 for a revised landfall area and small amendment to the onshore cable route for the Race Bank offshore wind farm across the field between the primary and secondary sea defences and connecting back into the original cable route. The attached plan refers.

Specifically I wanted to check whether Lincs County Council would require an archaeological walkover and geophys survey prior to the commencement of development, as per condition 4.

Following the investigative work that was done for the Lincs wind farm I think we are all content that potential is quite low in this location. On that basis might some form of watching brief while the site is being cleared etc be a more appropriate way to go than full geophys survey of the area?

If you could let me know your thoughts please I'd be very grateful. We can then consider an approach to the LPA to satisfy or seek to relax the condition.

With best regards, Simon
