COVERING LETTER

FAO – Planning Department

We are submitting an application on the whole for the permission to erect a boundary fence adjacent to New Road at the named residential property.

At present the property has a less than pleasing 2+m high hedge adjacent to New Road which overhangs the public pathway which even when trimmed still encroaches on the pathway.

My client has had received correspondence from Lincolnshire County Council, Highways South regarding the trimming back of this hedge with the possibility of serving notice and also from Sutton Bridge Parish Council (Copies can be supplied if required).

Therefore my client would like to diffuse this situation by carrying out the following works to “please all” and restore the balance between all concerned.

The intention would be to remove the hedge and restore the position of the original boundary and erecting the new fence along this line, this will restore the public pathway to its original width eliminating the risk to

public safety and greatly improving the street scene along the front boundary of the property, this will create a maintenance free boundary and satisfy the “Local Highways South” & Sutton Bridge Parish Council, Ensuring the local community can use this area of the road side safely.

Please do not hesitate to contact me should you require any further information.

Kind Regards

Mark Bonner ACABE
