Site Location: Boud Minerals & Polymers Warehouse, West Bank Road Sutton Bridge PE12 9UR

Summary of Proposal: Proposed Open Storage Buildings, Concrete Yard and Access - Approved under H18-0310-23. Modification of Condition 2 to allow amendments to previously approved plans

Dear Sir/Madam,

Thank you for your consultation on the above application.

The site is within the Internal Drainage District (IDD) of the South Holland Internal Drainage Board (IDB) and therefore the Board's Byelaws apply. Whilst the Board's regulatory process (as set out under the Land Drainage Act 1991 and the Board's Byelaws) is separate from planning, the ability to implement a planning permission may be dependent on the granting of any required Land Drainage Consents.

The Board's Officers have reviewed the documents submitted in support of the above planning application. Although no consent is currently required from the Board, officers have noted a potential for conflict between the planning process and the Board's regulatory regime. The potential conflict is detailed below and overleaf.

If consents are in fact required, the Board strongly recommends that these are sought from the Board prior to determination of this planning application. The annexe at the end of this letter outlines the Board's regulatory function and how to apply for Land Drainage Consent.

Byelaw / Section of Act	Description	Requirement
Byelaw 3	Discharge of water to a watercourse (treated foul or surface water)	Consent not currently required
Section 23, Land Drainage Act 1991	Alteration of a watercourse	Consent not currently required
Byelaw 10	Works within 9 metres of a Board arterial watercourse	Not applicable

Duncan Worth (Chairman) Simon Bartlett (Vice-Chairman) Marcus Coleman (Chief Executive)
Constituted by The Anglian Water Authority (South Holland Internal Drainage District) Order 1974, Statutory Instrument 1974 No.1209. Reconstituted in 1993. Statutory Instrument 1993 No.453.

Byelaw 3 (Surface Water)

As stated in our previous consultation for H18-0445-25, we understand that the applicant proposes to discharge surface water into the River Nene via an existing outfall at their adjacent site. The River Nene is a statutory main river regulated by the Environment Agency and therefore the Board will not comment further on the design of the drainage system.

If for any reason, the applicant proposes to discharge surface water to an ordinary watercourse, consent would be required under Byelaw 3. Please note that we recommend that any discharge is in line with the Non-Statutory technical standards for sustainable drainage systems (SuDS), therefore the Board is unlikely to grant consent for discharges in excess of greenfield rate.

Byelaw 3 (Treated Foul Water)

The applicant's proposals will not require the disposal of foul water, therefore Byelaw 3 (treated foul water) does not apply.

Section 23, Land Drainage Act 1991

The nearest watercourse to the proposed development is the River Nene. As this is designated as a Main River, the Environment Agency are the relevant regulators for any proposed works which may affect this watercourse.

I am not aware of any riparian owned/maintained watercourses within or adjacent to the site boundary, however this should be confirmed by the applicant. Should the applicant's proposals include works to alter a watercourse, or if works are proposed to alter a watercourse at any time in the future, consent would be required under the Land Drainage Act 1991 (and byelaw 4).

Byelaw 10

There are no Board arterial watercourses within or adjacent to the site boundary therefore Byelaw 10 does not apply.

Please see the supplementary information overleaf for further detail on the Board's policy and consenting process.

If, following review of our comments and supporting policy documents linked below, you wish to discuss any of the requirements I have raised, please contact the Board using the details at the head of this letter.

Yours sincerely,

Millie

Millie Hurlock
Assistant Sustainable Development Officer
Water Management Alliance

How to Apply for Land Drainage Consent

To apply for Land Drainage Consent please complete an application form.

Application forms, application fees and 'Frequently Asked Questions' can be found on the 'Development & Consent' section of the Board's website, here: https://wlma.org.uk/development-consent/

For any additional help please call us on 01553 819600 or email planning@wlma.org.uk

Byelaws

A copy of the IDB Byelaws can be found via the following link:

Mapping

Mapping of the district can be viewed via the following link: https://wlma.org.uk/mapping/

Further Guidance

The Board's webpages seeks to provide:

- Guidance on how (and why) the Board will review and comment on planning applications.
- Information on the policies against which the Board will assess and determine applications.
- Guidance to riparian (waterside) landowners regarding watercourse maintenance.

Please see the Development and Consent pages on the Board's website via the following link: https://wlma.org.uk/development-consent/

Arterial Watercourses

Maps on the Board's website show which watercourses are designated as Arterial Watercourses by the Board. You may also have heard these watercourses referred to as 'Main Drains' or 'Maintained Watercourses'. The designation is an acknowledgement by the Board that the watercourse is of arterial importance to the Internal Drainage District and as such will normally receive maintenance from the WMB using the Board's Permissive Powers. Although the Board opts to proactively maintain this arterial network, there is no change in the ownership or liability associated with the watercourse resulting from this designation.

Why we have commented on this planning application:

By engaging with the planning process the Board is seeking to:

- Reduce flood risk to communities within the Internal Drainage District
- Promote sustainable development in sustainable locations by supporting sound planning decisions in accordance with the National Planning Policy Framework (especially Paragraph 181) and the National standards for sustainable drainage systems (SuDS)
- Reduce the potential for conflict between the planning process and the Board's regulatory process.
