

Viewpoint A: Local road south of Sutton Bridge.
Viewpoint is located approximately 700m west of BESS proposal and adjacent to the existing solar farm.
The BESS proposal would be screened behind the mature tree line and existing solar panels.
By year 10 the planting associated with the solar farm would be mature and would screen all of the solar farm and views to the east.

Viewpoint B: King John Bank.
Viewpoint is located approximately 800m southeast of the BESS proposal and approximately 400m from the existing solar farm.
The BESS proposal would largely be screened from view by the intervening solar panels although limited upper parts of the proposed battery units and water tank may be discernible.
By year 10 the planting associated with the solar farm would be mature and screen most elements in views to the west.
