2 Work is to be carried out in accordance with BSI 3998 : 2010, 'Recommendations for Tree Work'.

The necessary consent of all other interested parties should be obtained before the works proceed.

Avoid pruning horse chestnuts in the spring months directly prior to and immediately after bud opening as bleeding of sap from pruning cuts may be a problem. Ideally prune between leaf fall and February.

Other than the removal of dead wood lime trees should preferably be pruned in late July and August or alternatively in the autumn months. Avoid pruning from the end of January onwards, as the bleeding of sap may be a problem.
