FLOOD RISK ASSESSMENT - ASHLEA FARM

Whilst this site lies within a flood risk area it will not be occupied by personnel once installed and as such provides an extremely low risk to human life. The site is currently down to farm grassland and the characteristics of the site will not be changed greatly but for the addition of the solar panel arrays.

With the above in mind we consider that despite being sited within a flood risk area this is not detrimental to the proposed development.

Yours faithfully

A M Woodward
