one of the most important. The American College of Sports Medicine (ACSM) has published a position statement on physical fitness testing in the workplace (1). Unfortunately, as can be inferred from numerous published studies, the ACSM's recommendations have not been followed. The purpose of this editorial is to address the ACSM's position on fitness testing in the workplace, to review the current state of knowledge on the topic, and to suggest some guidelines for the use of fitness testing in the workplace. The review is organized into three sections: (1) the ACSM's position on fitness testing in the workplace, (2) the current state of knowledge on the topic, and (3) guidelines for the use of fitness testing in the workplace.
