It is possible that the use of the term "contract" in the above definition is not as straightforward as it may seem. For example, the term "contract" is used in many different contexts, and it is not always clear what is meant by the term. In the context of the law of contract, the term "contract" refers to a legally binding agreement between two or more parties. However, in the context of the law of tort, the term "contract" may refer to a relationship between two parties that is not legally binding. Therefore, it is important to be clear about the context in which the term "contract" is being used.
