

Architectural drawings for a proposed extension and garage. The main drawing shows a plan view of a house with rooms: Master Bedroom, Bedroom, Reception, Bathroom, Cupb, Lounge, Kitchen, Utility, W/c, and Family Room. A new extension is proposed, including an Annexe, En-Suite, and Garage. Dimensions are provided for various parts of the extension and existing structure. A section line Z-Z is shown. A smaller detail drawing shows a cross-section of the extension and garage, indicating the relationship between the new structure and the existing house. The detail shows the extension, garage, and shed, with dimensions for the extension and garage. A note indicates that the extension is to be extended in height to suit the new patio level or provide new i.c. (internal clearance).

A vertical scale bar with a total length of 50 units. It is marked with major ticks at 0, 1, 2, 4, and 6. Between the major ticks at 1 and 2, and between 4 and 6, there are four smaller, unlabeled ticks, dividing each major interval into five equal parts of 10 units each.

A horizontal scale bar with major tick marks at 0, 2, 4, and 6. There are 10 minor tick marks between each major tick mark, representing 1/100 units. The text "Scale Bar 1/100" is written below the bar.
