

Thursday 11th July 2013

Bluefield Energy appreciates your attendance at today's Public Consultation. We hope that you found our information and discussions helpful in permitting you to understand more with regard to the proposed project.

We are seeking planning permission for a solar farm of **<10 MWp at Little Eau** which will generate enough electricity to supply over 1,350 homes in the UK as well as save approximately 3,950,000kg CO* emissions per year.

Solar farm projects are of a temporary nature and at the end of their 25 year term they will be removed and this may well be a requirement of any future planning consent, permitting the land to be returned and used for new purposes.

We expect to submit our Planning Application in the next few weeks and if all goes well we would expect to commission the plant before the end of March 2014.

Finally we would like to ask you to complete the following information and question:

Are you able to register your support for the proposed schemes? (Please tick your choice below);

Scheme	Yes	Do not know	No
Little Eau	☒	☐	☐

Please confirm your name and post code;

Name	Post Code	Contact Details

If you have any other comments please feel free to write in the box below (continuing overleaf if required)

Once again, and behalf of Bluefield, thank you for attending and showing interest in this development.

Once again, and behalf of Bluefield, thank you for attending and showing interest in this development.

Thursday 11th July 2013

Bluefield Energy appreciates your attendance at today's Public Consultation. We hope that you found our information and discussions helpful in permitting you to understand more with regard to the proposed project.

We are seeking planning permission for a solar farm of <10 MWp at Little Eau which will generate enough electricity to supply over 1,350 homes in the UK as well as save approximately 3,950,000kg CO* emissions per year.

Solar farm projects are of a temporary nature and at the end of their 25 year term they will be removed and this may well be a requirement of any future planning consent, permitting the land to be returned and used for new purposes.

We expect to submit our Planning Application in the next few weeks and if all goes well we would expect to commission the plant before the end of March 2014.

Finally we would like to ask you to complete the following information and question:

Are you able to register your support for the proposed schemes? (Please tick your choice below);

Scheme	Yes	Do not know	No
Little Eau			☒

Please confirm your name and post code;

Name	Post Code	Contact Details

If you have any other comments please feel free to write in the box below (continuing overleaf if required)

We strongly disagree with the Fenndyke ~~Quetta~~ development.

Taking good agricultural land out of production
Too Much green energy with Turbines etc
already. The attitude of the agronomist is
unbelievable. Telling me to move and live
Somewhere else.

Once again, and behalf of Bluefield, thank you for attending and showing interest in this development.

Find somewhere to put it that isn't going to affect peoples houses. There will be no real benefit to the community

160 acres so close to St John St James on
Grade 2 farmland is not acceptable
— They should be put on brown field sites
miles from residences

Once again, and behalf of Bluefield, thank you for attending and showing interest in this development.

Adversely affect the local landscape and visual amenity, which is essentially a rural open area. And of detriment to my property.

Is inappropriate and harmful to the area.

Once again, and behalf of Bluefield, thank you for attending and showing interest in this development.
