CASE OFFICER ASSESSMENT

Description of Proposal

This is a full planning application to clad an existing agricultural barn. Whilst the frame of the building would remain intact, new walls would be added and the overall appearance of the structure would change accordingly. Due to the changes in materials, the eaves and ridge height would be raised by 15mm and 10mm respectively. Walls and roof coverings would be anthracite grey sheet metal.

No change of use is proposed as a part of this application.

Site Description

The site is located outside of any of the settlement boundaries outlined within the South East Lincolnshire Local Plan, 2019, and can therefore be considered to be within the Countryside. The site is approximately 350m south of Sutton St James, along the narrow Mill Lane.

The development site is located at the point where Mill Lane leads into Taylor Drove, a narrow access track. Lynn House is currently comprised of a red-brick dwelling to the north of the site, and an agricultural yard

Relevant History

H20-1148-25 - Full - Erection of an oak framed double garage and a single storey gym / training building. Demolition of existing outbuilding structures to replace with two single storey, storage units for business use and the repurposing of the existing barn structure to create a dedicated workshop building for business use - Retrospective - Refused 23/01/26

H20-0239-26 - PAA Class R - Change of Use of Barn to Flexible Commercial Use - Refused 14/05/26

Consultation Responses

The responses received from consultees during the initial consultation exercises, which can be viewed in their entirety through the South Holland website, can be summarised as follows:

SELCP Ecologist

Having reviewed this application, we have no comments regarding ecology.

Highway and Lead Local Flood Authority

No objections - The proposal does not have an impact on the Public Highway.

North Level Internal Drainage Board

Please note that North Level District Internal Drainage Board have no comments to make regarding the above planning application.

Public Representations

This application has been advertised in accordance with the Development Procedure Order and the Council's Statement of Community Involvement. In this instance, no letters of representation have been received.

Key Planning Considerations

Evaluation

Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019 (SELLP), is the development plan for the district, and is the basis for decision making in South Holland. The relevant development plan policies are detailed within the report above.

The policies and provisions set out in the National Planning Policy Framework, 2024 (NPPF) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Principle of Development

Policy 1 of the SELLP sets out the settlement hierarchy in respect of delivering sustainable development, which meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local need, whilst making more sustainable use of land, and to minimise the loss of high-quality agricultural plots by developing in sustainable locations and at appropriate densities.

Policy 1 expresses this sustainable hierarchy of settlements, ranking the settlements deemed to be most sustainable in descending order. The most sustainable locations for development are situated within the 'Sub-Regional Centres', followed by 'Main Service Centres'. Lower down the hierarchy are areas of limited development opportunity including Minor Service Centres, with areas of development constraint comprising 'Other Service Centres and Settlements'. The countryside is at the bottom of the settlement hierarchy and represents the least sustainable location.

The site is located outside of any defined settlement, as outlined in the SELLP, and can therefore be considered to be within the countryside for the purposes of Policy 1. In this context, Policy 1 states: "In the Countryside development will be permitted that is necessary to such a location and/or where it can be demonstrated that it meets the sustainable development needs of the area in terms of economic, community or environmental benefits."

The proposal relates solely to works to an existing agricultural building. There would be no change of use deriving from these works.

As such, the proposal is considered to be in accordance with the requirements of the SELLP when viewed in principle. This is subject to the assessment against site specific criteria; including (but not limited to) the impact of the proposal on the character or appearance of the area, impact on the residential amenities of neighbouring occupiers, and impact on highway safety, which are discussed in turn in the following sections.

Layout, Design, Scale and Consideration of the Character of the Area

Section 12 of the NPPF, "Achieving well-designed places", states that the "creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within Section 12 of the NPPF, states that new development should function well and add to the overall quality of the area (including beyond the short term) and should be visually attractive as a result of good architecture and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality, to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing. Developments should create places that are safe, inclusive, and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Likewise, Policy 2 of the SELLP outlines sustainable development considerations for proposals; providing a framework for an operational policy to be used in assessing the sustainable

development attributes of all development proposals. Furthermore, Policy 3 of the SELLP requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the NPPF and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable. Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design, and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

The proposal would significantly alter the appearance of the building. However, the building would still largely read as an agricultural building. Comparable structures are commonplace in South Holland, and would therefore, the addition here would not appear incongruous.

Taking account of the design, scale, and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with Policies 2 and 3 of the SELLP and Section 12 of the NPPF.

Impacts Upon Resident Amenity

Paragraph 135 of the NPPF states that development should create places that are safe, inclusive, and accessible and which promote health and well-being, with a high standard of amenity for existing and future users.

Policies 2 and 3 of SELLP sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

The nature of the development means that there would be no wider residential amenity implications.

As detailed above, the scale and design of the proposal is considered to have no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with Section 12 of the NPPF and Policies 2 and 3 of the Local Plan in terms of impact upon residential amenity.

Highway Safety and Parking

Section 9 of the NPPF is titled 'Promoting sustainable transport'. Within this, Paragraph 116 advises that "development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network, following mitigation, would be severe, taking into account all reasonable future scenarios".

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal. Policy 33 further reinforces the need for developments to be accessible via sustainable modes of transport.

Policy 36 of the SELLP, in conjunction with Appendix 6, sets out minimum vehicle parking standards.

As the proposal relates solely to alterations to an existing building, there would be no highway impacts.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Policies 2, 3, 33 and 36 of the SELLP, as well as Section 9 of the NPPF.

Biodiversity Net Gain

Schedule 7A of the Town and Country Planning Act 1990 (inserted by the Environment Act 2021) requires developers to deliver a minimum of 10% Biodiversity Net Gain using standardized biodiversity units measured by statutory biodiversity metrics. This is often referred to as the mandatory requirements for Biodiversity Net Gain.

"Under the statutory framework for biodiversity net gain, subject to some exceptions, every grant of planning permission is deemed to have been granted subject to the condition that the biodiversity gain objective is met ("the biodiversity gain condition"). This objective is for development to deliver at least a 10% increase in biodiversity value relative to the pre-development biodiversity value of the onsite habitat. This increase can be achieved through onsite biodiversity gains, registered offsite biodiversity gains or statutory biodiversity credits".

The biodiversity gain condition is a pre-commencement condition. This relates to a condition that seeks, once planning permission has been granted, a Biodiversity Gain Plan that must be submitted and approved by the planning authority before commencement of the development, alongside the need to submit a Habitat Management and Monitoring Plan.

The effect of Paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990 is that planning permission is deemed to have been granted subject to the "biodiversity gain condition". The effect of this "biodiversity gain condition" is that development granted by this notice must not begin unless:
(a) a Biodiversity Gain Plan has been submitted to the planning authority, and
(b) the planning authority has approved the plan, or
(c) the development is exempt from the biodiversity gain condition.

The proposal would merely add cladding to an existing structure and would not result in any impact upon habitat. The proposal therefore falls under the de minimis exemption.

Other Matters

It should be noted that the proposal stems from a previous application on the site H20-0239-26, which sought prior approval for the change of use of the barn to a flexible commercial use. Class R of Part 3 of the General Permitted Development Order, 2015, does not permit any development to facilitate the change of use.

Whilst H20-0239-26 was refused, the reasons for refusal did not relate to the details of H20-0372-26. Moreover, no change of use has been proposed here, with this application purely focussing on external works to an existing agricultural building. Therefore, there would not be conflict between the granting of this permission and the previous refusals on site.

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development within a defined agricultural unit. The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents, and provides adequate parking, whilst conforming with the SELLP and the provisions of the NPPF when viewed as a whole.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:
A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act
B. Advance equality of opportunity between people who share a protected characteristic and those

who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).
C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Conclusion

Taking these factors into consideration, the proposal is considered to comply with Policies 1, 2, 3, 33 and 36 of the SELLP, as well as Sections 9, 12 and 15 of the NPPF. There are no significant factors in this case that would outweigh the benefits of the proposal; therefore, the planning balance is in favour of the proposal.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
