ARCHITECTURAL DESIGN AND BUILDING

APPROVAL OF PLANNING CONDITIONS - SUMMARY

Erection of dwelling - H20-0006-19

Introduction

This application seeks to clear all pre-commencement planning conditions so that works can commence.

Condition 5 - Existing and proposed site levels

The drawing submitted with this application details all existing proposed site levels, as well as giving detailed sections.

Condition 7 – Surface water discharge

The proposed dwelling's surface water will discharge to the existing drain at the front of the site (with I.D.B's consent for discharge), therefore no soakways are proposed on site – see proposed plans submitted with this application.
