Attachments: STREET APPLICATION AMENDMENT.pdf

Dear Sirs,

Please find attached completed amendment form for the above planning application.

The amended details are as follows: Kennels will be of composite material with 70mm insulation. Runs will be 10 gauge galvanised wire mesh in galvanised box frame and plastic dividing panels. The thickness of the insulation coupled with the individual runs being self contained will help the noise reduction. A waste disposal company SRCL will be disposing of the waste from the kennels.

I trust that this is satisfactory.

Yours faithfully

Julie Grant
