CASE OFFICER ASSESSMENT

Proposal

This is a householder application seeking permission for a proposed single storey extension at Catlins Barn, Childersgate, Sutton St James.

The extension would protrude from the side elevation by around 6200mm and would have a length of 7300mm. Furthermore, it would sit slightly lower than the main house, having a total height of roughly 5300mm and an eaves of 2600mm.

Finally, it would be constructed from buff bricks, concrete tiles and white uPVC windows to match.

Site Description

The application site comprises a detached bungalow located on Childersgate in Sutton St James. The site is located outside any settlement boundary and within the open countryside. The bungalow features black cladding following a recent permission. The site benefits from a large gravelled driveway to the front providing off-street parking provision for several vehicles. a detached black cladded outbuilding is located toward the north-west of the bungalow.

History

H20-0804-21 - Proposed black cement board cladding to block work on dwelling - Approved

Consultation Responses

South Holland Internal Drainage Board

Byelaw 3 - Consent Reqruierd

Section 23, Land Drainage Act 1991 - Consent not currently required

Byelaw 10 - Consent Required

Lincolnshire County Council Highways & SUDS

No Objections

Having given due regard to the appropriate local and national planning policy guidance (in particular the National Planning Policy Framework), Lincolnshire County Council (as Highway Authority and Lead Local Flood Authority) has concluded that the proposed development would not be expected to have an unacceptable impact upon highway safety or a severe residual cumulative impact upon the local highway network or increase surface water flood risk and therefore does not wish to object to this planning application.

Comments:

This proposal is for a single storey extension to bungalow. The access remains unchanged and parking arrangements are sufficient for the increase in bedroom number; therefore, it is considered that the proposals would not result in an unacceptable impact on highway safety. As Lead Local Flood Authority, Lincolnshire County Council is required to provide a statutory planning consultation response with regard to drainage and surface water flood risk on all Major applications. This application is classified as a Minor Application and it is therefore the duty of the Local Planning Authority to consider the surface water flood risk and drainage proposals for this planning application. However please note the IDB comments.

Public Representation

This application has been advertised in accordance with the Development Procedure Order and the Council's Statement of Community Involvement. In this instance, one letter of representation has been received, these have been summarised below:

Key Planning Considerations

The main issues and considerations in this case are (but are not limited to):
- Principle of Development and Sustainability
- Layout, Design, and Impact on the Character of the Area
- Impact on Neighbouring Residents/Land Users/Land Uses
- Highway Safety and Parking

Evaluation

Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

In this case, the adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019, forms the development plan for the District, and is the basis for decision making in South Holland. The relevant development plan policies are detailed within the report above .

The policies and provisions set out in the National Planning Policy Framework (updated August 2026) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Planning Considerations

Principle of Development and Sustainability

The South East Lincolnshire Local Plan (2019) sets out the settlement hierarchy in respect of delivering sustainable development that meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local housing need, whilst making more sustainable use of land and to minimise the loss of high-quality agricultural land by developing in sustainable locations and at appropriate densities.

Policy 1 of the South East Lincolnshire Local Plan (2019) sets out a spatial strategy for delivering sustainable development across South East Lincolnshire to 2036. Policy 1 (Spatial Strategy) expresses this sustainable framework of settlements, ranking the settlements deemed to be most sustainable in descending order.

Policy 1 (Spatial Strategy) of the South East Lincolnshire Local Plan (2019) indicates that within Main Service Centres, development will be permitted that supports their role as a service centre for the settlement itself, helps sustain existing facilities or helps meet the service needs of other local communities.

The application site in this instance is in the open countryside as detailed by Policy 1. Regardless of such, the proposal solely relates to an extension at an existing and established residential dwelling and therefore, the principle of such development is considered to be appropriate, comprising an appropriate form of development for the location.

As such, the proposal is considered to be acceptable with the requirements of the South East Lincolnshire Local Plan (2019) when viewed in principle. This is subject to the assessment against site specific criteria; including (but are not limited to) the impact of the proposal on the character or appearance of the area, impact on the residential amenities of neighbouring occupiers, and impact on highway safety, which are discussed in turn as follows.

Layout, Design and Consideration of the Character and Appearance of the Area

Section 14 of the National Planning Policy Framework (2026) specifically relates to 'Achieving well-designed places' and details that the objective of the policy is to "promote high quality, healthy, inclusive and sustainable places, through setting clear expectations about design outcomes and the use of relevant tools and processes" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 1 of DP3, contained within Section 14 of the National Planning Policy Framework (2026), states that development proposals should respond to their context to integrate with and enhance their surroundings. This can be achieved through the arrangement of plots and buildings, use of materials and architectural features, as well as the restoration, reuse and integration of heritage assets. Notwithstanding this, it should not preclude innovation or change where it is considered to

be appropriate, particularly where an increased scale or density can be justified.

In order to create well-designed places, Paragraph 2 states proposals should reflect seven key principles, as appropriate to the nature of the development and its location. These include, liveability, climate, nature, movement, built form, public space and identity.

Further to this, Paragraph 3 of Policy DP3 goes on to establish that proposals should be refused if, without clear justification, they conflict with Paragraph 1 or the relevant aspect of the principles within Paragraph 2, as outlined above. Alongside this, explicit design standards set out within the development plan must also be taken into consideration. Conversely, substantial weight should be given to compliance with development plan policies when assessing the design quality of proposals.

Likewise, Policy 2 of the South East Lincolnshire Local Plan (2019) outlines sustainable development considerations for development proposals, providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, Policy 3 of the South East Lincolnshire Local Plan (2019) accords with the provisions of Section 14 of the National Planning Policy Framework (2026), in that it requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically-designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the National Planning Policy Framework (2026) and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable. Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

As outlined above, the extension would protrude from the side elevation by around 6200mm and would have a length of 7300mm, this would also be set to a single storey level in line with the existing bungalow and would have a height of roughly 5300mm.

The extension is considered to be proportionate in relation to the existing bungalow due to the footprint it features paired with the subservient aspect of the height and the large size of the plot to allow for expansion. Furthermore, the rural setting of the area ensures that following the construction of the extension, no harm would be caused to the street scene and locality. It is therefore considered that the mass and scale proposed are suitable in this regard and work well within the plot.

Alongside this, it would be constructed from buff bricks, concrete tiles and white uPVC windows all to match the existing dwelling. Whilst the existing property features black cladding, as approved previously, brickwork is still a prominent feature and therefore ensures it remains in keeping with the built form on site.

Taking account of the design, scale and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with Policies 2 and 3 of the South East Lincolnshire Local Plan (2019) and Section 14 of the National Planning Policy Framework (2026).

Impact on Residential Amenity/Land Users

Policy DP3, Paragraph 2, of the National Planning Policy Framework (2026) states that development should create places that are safe, inclusive, and accessible and which promote health and well-being, with a focus on promoting liveability.

Likewise, Policy P3(1) outlines that development proposals should be appropriate for their location, taking into account the likely effects (including cumulative effects) of pollution on health, living conditions and the natural environment, whether these effects are on or off-site. This point is expanded upon in P3(2) which states all development proposals should "provide healthy living conditions for occupiers and users in terms of adequate access to light and avoiding exposure to levels of air, noise, artificial light or other sources of pollution which could have an unacceptable adverse effect on health and the quality of life".

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

The nearest residential properties in relation to the application site are over 550m away; as such there would be no material overlooking or overshadowing harm to the residential amenity. The lack of nearby residential properties ensures that the proposal would cause no harm and therefore arises no impacts as a result of this.

As detailed above, the scale and design of the proposal is considered to be such that there would be no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with the provisions of the Section 14 of the National Planning Policy Framework (2026), and Policies 2 and 3 of the South East Lincolnshire Local Plan (2019).

Highway Safety and Parking

Section 15 of the National Planning Policy Framework (2026) specifically relates to 'Promoting sustainable transport'. Policy TR6 (4) advises that "Development proposals should be refused if they would have a severe adverse impact on the transport network (in terms of capacity and congestion, including cumulative impacts), or an unacceptable impact on highway safety; taking into account any mitigation measures proposed as well as any wider network improvements, including measures to support sustainable patterns of movement. This applies both during the construction phase and following completion".

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal.

Furthermore, Policy 36, to be read in conjunction with Appendix 6, of the South East Lincolnshire Local Plan (2019), sets out minimum vehicle parking standards and requires at least two spaces for dwellings of up to three bedrooms and three spaces for dwellings with four or more bedrooms.

The proposal would see an increase from three to four bedrooms within the dwelling, as such three vehicle parking spaces are required in order to accommodate this and be in accordance with Appendix 6 above. It is considered that the driveway within the plot provides suitable space to provide adequate parking arrangements and therefore is in accordance with Appendix 6. Furthermore, LCC Highways have raised no objections to the proposal from a highway safety perspective either.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Policies 2, 3 and 36 the South East Lincolnshire Local Plan (2019), and Section 15 of the National Planning Policy Framework (2026).

Flood Risk

Section 18 of the National Planning Policy Framework (2026) explains that the objective of the policy is to "minimise risks to development arising from all sources of flooding and coastal change, taking into account the impacts of climate change, by steering development away from areas of risk, ensuring that development will be safe for its lifetime without increasing flood risk elsewhere, and incorporating sustainable drainage systems where appropriate".

The site lies within Flood Zones 3 of the Environment Agency's Flood Maps. These have been created as a tool to raise awareness of flood risk with the public and partner organisations, such as Local Authorities, Emergency Services and Drainage Authorities. The Maps do not take into account any flood defences.

The South East Lincolnshire Strategic Flood Risk Assessment (SFRA) provides an overview of how flood risk has been considered in shaping the proposals of the Local Plan; including the spatial strategy and the assessment of housing and employment sites. Policy 4 of the South East Lincolnshire Local Plan (2019) is clear in that "Development proposed within an area at risk of

flooding (Flood Zones 2 and 3 of the Environment Agency's flood map or at risk during a breach or overtopping scenario as shown on the flood hazard and depths maps in the Strategic Flood Risk Assessment) will be permitted" in instances where specific criteria is met.

Policy F5(3) of the National Planning Policy Framework (2026) states "the strategic flood risk assessment covering the area of the proposed development and the Flood Map for Planning should provide the evidential basis for applying the sequential test". It is worth noting that large parts of the district of South Holland lie within Flood Zone 3. It is therefore necessary to use the refined flood risk information (Hazard and Depth maps) within the SFRA as a basis to apply the sequential test.

In any case, it is important to note that whilst minor developments such as householders must meet the requirements for site-specific flood risk assessments, they should not be subject to the sequential test, nor the exception test, as outlined in Policy F5, Paragraph 2, Point C, which details that "The sequential test should be used in areas known to be at risk now or in the future from any form of flooding, other than for - householder development".

Therefore, in line with Policy F5(2)(ci) and F6(2)(a), there is no need to apply the exceptions or sequential tests.

Despite the property being within Flood Zone 3 and Danger for Some within the SFRA, as the application is purely for an extension to an existing residential property; there would not be any significant harm raised and it would not materially increase the flood risk for the site and surrounding area in a harmful way.

Overall, when considering the development on balance, it is considered that given the mitigation measures detailed and recommended by condition, the proposal accords with Policies 2, 3 and 4 of the South East Lincolnshire Local Plan (2019) and the intentions of the National Planning Policy Framework (2026) in this regard.

Drainage

In addition to the above considerations of flood risk, Policy 4 also concerns site drainage.

The Internal Drainage Board objected to the scheme on the grounds that works would violate their byelaws. An amended drainage statement has subsequently been received by the Council. As a result, the works would be consistent with the byelaws of the IDB, and there would be no conflict between the two regimes.

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development outside the defined settlement boundary. The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents, and provides adequate parking, whilst conforming with the South East Lincolnshire Local Plan (2019) and the provisions of the National Planning Policy Framework (2026) when viewed as a whole.

In this instance, there are no material considerations that weigh against the proposal and as such, the planning balance is in favour of the development.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:
A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act
B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share

a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).
C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Conclusion

Taking the above considerations into account, the proposal is considered to be in accordance with Policies 1, 2, 3, 4 and 36 (including Appendix 6) of the South East Lincolnshire Local Plan (2019), along with the identified sections contained within the National Planning Policy Framework (NPPF) (2026). The are no significant factors in this case that indicate against the proposal and outweigh the consideration in favour of the proposal and the policies referred to above.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
