The written scheme submitted here for building recording has been approved by this department. However before Condition 18 can be discharged the written scheme for archaeological monitoring and recording during groundworks should also be submitted so that they can both be approved together.

This is in accordance with our original recommendation, and the scope of the works that has been agreed, which included both recording the forge prior to demolition and then archaeological recording during groundworks for the new development.

The developer's archaeological consultant has already provided us with the written scheme for monitoring groundworks, but to be formally approved it needs to be submitted to South Holland District Council as the local planning authority.
