**For/Against** Comments

The document submitted here not a written scheme of archaeological investigation (or specification) that is required by condition 19 of H21-0504-18. It is actually the brief produced by this department that outlines the archaeological work required, not a specification for how this work will be undertaken.

The brief is designed to be used by the developer as a guide in order to help procure the archaeological work required. It cannot be used as a specification for the proposed works, which will need to outline how this work will actually be undertaken, nominate the competent person or organisation to complete the work, as well as detail how the work will be reported on and archived in line with the requirements of the Lincolnshire Archaeological Handbook.

The developer needs to submit a written scheme of archaeological investigation (WSI) that meets these requirements in order for condition 19 to be discharged.
