Application H22-0450-17
Location Site adj to 30 Austendyke Road Weston Hills Spalding PE12 6BX
Proposal Details of Contamination Method Statement (Condition 8 of H22-1300-16)

Name Noise and Contaminated Land
Address Environmental Health Technician Safety and Environment

Date Submitted 08-06-17
For/Against Comments

The Remediation Method Statement By Humberside Materials Laboratory Limited Reference 973/4008/P dated April 2017 is satisfactory.

However the condition cannot be discharged at this time as a validation report is required which evidences the remediation works.

Prior to the development the depth of the cover system in the garden areas needs to be agreed as this was not discussed in the report.

I would also recommend that a summary of this report is produced to clarify the works, validation and evidence required. This should be given to the developer to act as a 'checklist' during the project.
