30th July 2026

Dear Rob,

H22-0566-26

Proposed free range egg production unit, Delgate Bank, Weston

I have recently been contacted by a number of constituents who have raised their concerns about the above planning application.

Undoubtedly this proposal will lead to a significant increase in traffic movements along rural country lanes with no passing points for heavy goods vehicles; these lanes are not routinely gritted during the winter months which could cause hazardous conditions and result in accidents.

Smell and noise are of particular concern to my constituents, the odour from the manure and associated flies, especially in the summer months, will have a detrimental impact on their enjoyment of their homes and gardens, especially given the prevailing SSW winds will direct the odour over Weston Hills. Particular concerns have been raised about the impact this proposal could have on the local watercourses with the Delgate Drain and Moulton Mere Drain being located nearby.

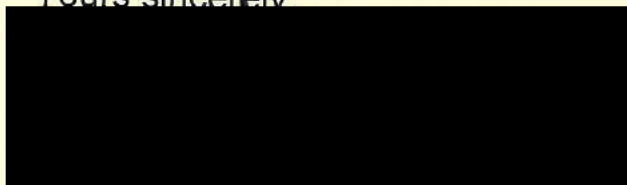

In addition, I note that Weston Parish Council has also raised a number of their own concerns, which I fully support. As the Parish Council has stated, more detailed information is required with regard to the management of the plan in relation to waste, odour, vermin pollution, disease, traffic, and environmental management, as well as future expansion in order to be able to properly consider the

application and the impact it will have on the area and for nearby residents

I would, therefore, be grateful if you could treat my letter as an objection to this proposal and request that this application is referred to the Planning Committee.

Yours sincerely

The Rt Hon Sir John Hayes CBE MP
South Holland and The Deepings
