CASE OFFICER ASSESSMENT

Proposal

Full planning permission is sought for the erection of multispan plastic greenhouses (approx. 96m x 76m at the widest point), additional car parking area (50m x 30m) and a lagoon (40m x 32m).

Site Description

The site is part of a nursery located in open countryside some 2.8km to the northwest of Weston. It is de-lineated by tree planting/hedging along its northern, southern and western boundaries.

Three residential properties front Marsh Road (Sunnyfield House, Herons Way and Cobblestones).

Recent Planning History

H22-0817-12 - Proposed polytunnels - Granted 12 November 2012

Consultation Responses

Weston Parish Council - No response.

LCC Highways/SUDs - Does not wish to restrict the grant of permission

South Holland IDB - Request further information concerning surface water drainage.

Environmental Protection - No objections.

Environment Agency - No objections.

Lincolnshire Police - No objections.

Planning Considerations

Principle

Policy 1 of the South East Lincolnshire Local Plan, 2019 indicates that new development will be permitted in the countryside where it is necessary to such a location and/or where it can be demonstrated that it meets the sustainable development needs of the area in terms of economic, community or environmental benefits. Explanatory text indicates that there are certain types of use that need to function in the countryside, such as agriculture and forestry.

The National Planning Policy Framework, March 2019 promotes sustainable economic growth. Paragraph 83 specifically indicates that planning policies and decisions should support the sustainable growth and expansion of all types of business in rural areas, both through conversion of existing buildings and well designed new buildings.

The proposal constitutes agricultural development in the countryside and satisfactorily complies with Policy 1 of the SELLP.

Character/Appearance

The proposed glasshouses, and related development, would be set back from the road and would be partially screened by existing perimeter hedging, buildings and glasshouses. They are typical of agricultural buildings commonly found in the fenland landscape and would visually relate to the existing nursery. They would not materially harm the character/appearance of the countryside.

The development therefore satisfactorily accords with Policies 2 and 3 of the South East Lincolnshire Local Plan, 2019 in this respect.

Amenity

Three residential properties front Marsh Road (Sunnyfield House, Herons Way and Cobblestones).

The proposed glasshouses, car park and lagoon would be used in conjunction with the existing nursery. The car park would be closest to the three properties, but there would still be a degree of separation due to large gardens. No objections have been received. The nature and scale of the development and its general relationship to neighbouring residential property is considered to be such that the amenity of nearby residents would not be harmed to a significantly greater degree in terms lack of privacy, overlooking, overshadowing, blockage of light, noise/disturbance, etc.

The development therefore satisfactorily accords with Policies 2 and 3 of the South East Lincolnshire Local Plan, 2019 in this respect.

Highway Safety

Access to the site is via an existing entrance and additional car parking is to be provided for staff and visitors. The County Highways Authority has been consulted and does not wish to restrict the grant of permission on highway safety grounds.

The development therefore satisfactorily accords with Policies 2, 3 and 36 of the South East Lincolnshire Local Plan, 2019 in terms of highway safety and parking.

Drainage

Surface water drainage would be discharged into a lagoon situated at the rear (size 40 m x 32 m x 2 m = 2560 m³). This lagoon would be self-contained and the water would be used for plant irrigation. SHIDB has requested that further information be provided by the applicant to identify how the lagoon would be sized to cater for the surface water that is created on site as well as additional rainfall events that would fall when the lagoon is already at capacity from onsite water. Would the lagoon be sized appropriately or would other means of discharged be proposed in these circumstances? They have therefore requested that the drainage strategy considers this in more detail.

There is no foul water drainage associated with this application.

Flood Risk

The site is within Flood Zone 3 on the Environment Agency Maps and within an area of "Danger for All" within the South East Lincolnshire Strategic Flood Risk Assessment. The sequential test should therefore be applied.

The Environment Agency's Flood Maps have been created as a tool to raise awareness of flood risk with the public and partner organisations, such as Local Authorities, Emergency Services and Drainage Authorities. The Maps do not take into account any flood defences. Also, large parts of the South Holland District lie within Flood Zone 3. It is therefore necessary to use the refined flood risk information (Hazard and Depth maps) within the South East Lincolnshire Strategic Flood Risk Assessment (2017) as a basis to apply the sequential test

The SFRA indicates that the site is within an area identified as "Danger for Most". However, there are not reasonably available alternative sites appropriate for the proposed development located in areas with a lower risk of flooding. It is not possible, consistent with wider sustainability objectives, for the development to be located in zones with a lower probability of flooding. The exceptions test should therefore be applied. It is a method to demonstrate and help ensure that flood risk to people and property will be managed satisfactorily, while allowing necessary development to go ahead in

situations where suitable sites at lower risk of flooding are not available. The NPPF and the PPG set out two elements to the Exceptions Test.

First, proposed development is required to show that it will provide wider sustainability benefits to the community that outweigh flood risk, and second, that it will be safe for its lifetime without increasing flood risk elsewhere and, where possible, will reduce flood risk overall. This is aimed at allowing necessary development to go ahead in situations where suitable sites at lower risk of flooding are not available whilst helping ensure that flood risk to people and property will be managed satisfactorily.

In terms of the first element, the development is required in conjunction with an existing agricultural enterprise and is therefore necessary in this location. It will also assist expansion of the business and economic growth. It is therefore considered that there are wider sustainability benefits to the community that outweigh flood risk.

Concerning the second element, the proposal constitutes commercial less vulnerable development and the structures are not for habitation with only short term and intermittent occupancy by workers. The Environment Agency has not objected to the development and has indicated that given the nature of the development it is unlikely that the greenhouses can be raised above ground levels. It is recommended, however, that a flood evacuation plan be prepared and the applicant is also advised to sign up to the Environment Agency's free Floodline Warnings Direct Service.

The development therefore satisfactorily accords with local and national policy in terms of flood risk.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:

- A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act
- B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).
- C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based

on the considerations set out in this report.

Planning Balance

No objections are raised in principle to agricultural development in this location. The nature, scale, appearance of the development and its relationship to neighbouring property is such that it would not materially harm the character/appearance of the countryside or amenity of nearby residents in terms lack of privacy, overlooking, overshadowing, blockage of light, noise/disturbance, etc. The County Highways Authority does not wish to restrict the grant of permission on highway safety grounds. There are no significant flood risk issues.

The proposal is therefore in accordance with Policies 1, 2, 3, 4, 30 and 36 of the South East Lincolnshire Local Plan, 2019. There are no significant factors in this case that indicate against the proposal and to outweigh factors in favour of the proposal and the policies referred to above.

Conclusion

The planning balance is in favour of the proposal. It is therefore recommended that the application be approved under delegated powers.
