Subject: EN0210007 - Weston Marsh to East Leicestershire - EIA Scoping and Consultation and Regulation 11 Notification

Hello Joe,

A relatively small part of this project is within SHDC. The proposed substations are outside SHDC and the Weston Marsh substations are being delivered via a different project. Therefore the impact of this project on SHDC is the approximately 12 km of overhead pylon route. The most impactful is the section between Pinchbeck and Surfleet where the route appears to be close to the built up area of Surfleet and the scattered dwellings between Surfleet and Pinchbeck.

The SA Scoping includes the following chapters: Chapter 6 Landscape, Chapter 7 Visual, Chapter 8 Ecology and Biodiversity, Chapter 9 Cultural Heritage Chapter, 10 Water Environment, Chapter 11 Geology and Hydrogeology, Chapter 12 Agriculture and Soils, Chapter 13 Traffic and Transport, Chapter 14 Air Quality, Chapter 15 Noise and Vibration, Chapter 16 Socio-economics, Recreation and Tourism, Chapter 17 Health and Wellbeing, Chapter 18 Climate Change Chapter, 19 Major Accidents and Disasters.

In addition the maps submitted with the SA Scoping appear to include relevant constraints and other information covered in the chapters listed above.

These are the usual subject areas and cover the likely impacts the proposal will have.

The Visual chapter refers to Surfleet. It might be worth mentioning that a housing estate for 48 units has recently been completed on Land off Sunnydale Close, Surfleet close to the route. Also in this location is a listed building that is shown on the maps. The impact will need checking once pylon positions are chosen.

It therefore appears that the relevant issues will be covered in the SA and the relevant technical specialists can add to that and critique the output once it is published in the SA.

Peter Udy
