Hi Becky,

Can this be added to file H22-1091-25 as EHO response please? Thanks

Please note that these comments only apply to the route 'Weston Marsh-South Forty Foot Drain'. Information relating to other sections has not been reviewed or considered.

We agree that air quality, noise and vibration should remain in scope. Depending on the exact proposals, artificial light impact should remain in scope for the development phase in terms of security lighting at compounds and access points where this has the potential to impact on residential receptors.

We would welcome the submission of a detailed construction and environmental management plan in due course, designed to reduce impacts to vulnerable receptors from noise, dust, light and emissions. This should include the steps to be taken to achieve the reduced impact and details of compliance monitoring to ensure those steps taken are effective. When work is ongoing close to residential receptors, it may be necessary to consider breaks in the proposed working hours (currently 7 days per week) to allow for some impact free days.

Where the route passes close to noise receptors, an assessment of the operational noise impact will be required.

Kind regards,

Sue

Sue Armour
