CASE OFFICER ASSESSMENT

Proposal

This Listed Building Consent application is for the installation of an air source heat pump and internal wall insulation into the attic of Whaplode House, 8 Stockwell Gate West.

Site Description

Whaplode House is a Grade II listed property. Historic England describes the property like so:

"House. Late C18, late C19. Red brick with ashlar dressings. Slate roof with modillion ashlar eaves parapet and 2 gable stacks. 2 storeys and attic, 3 bay front with central doorway with open modillioned pediment, dosserets, fluted pilasters, semicircular head with keystone and imposts, traceried fanlight, panelled reveal and door. Single glazing bar sashes flank doorway with 3 glazing bar sashes above, all with rusticated wedge lintels with keystones. 3 segmental headed dormers with glazing bar sashes. Plain contemporary staircase with square balusters and moulded rail. Room with pilasters elliptical arched alcoves either side of fireplace with moulded architrave."

The wider setting is characterised by a mix of open countryside and low density rural development. Immediately to the east of the site is the former barns, now abandoned which is considered to be a non-designated heritage asset. Otherwise, no buildings in the immediate vicinity are of particular interest or value to the setting of the listed building.

History

H23-0761-12

Proposed Installation of Heat Pump. Approved on 23-01-13.

Consultation Responses

Whaplode Parish Council

No objections

Planning Considerations

Heritage Impact

The Local Planning Authority does not consider there to be a risk presented to the value or significance of the associated heritage asset or its setting by this proposal. The proposed installation of insulation to the solid walls in the attic space is deemed to have no harmful character effect due to the fact that the space is already dry-lined with modern gypsum plasterboard, meaning that upon completion, the space shall appear close to like-for-like using identical materials.

The proposed heat pump would not be affixed to the listed building itself, and only a small incision into the brickwork would be necessary, which would certainly amount to less than substantial harm to be caused to the character of the setting. Furthermore, the unit would not be easily visible from the roadside and the adjacent property within the listed building block already has a very similar unit which was approved under H23-0761-12.

Due to the lack of an impact as laid out above, this application is deemed to assist in conserving the historic environment in accordance with S16 of the NPPF.

Residential Amenity

The Local Planning Authority does not consider there to be any negative impact upon residential amenity caused by this proposal. The application proposes no external dimensional alterations nor addition of any new windows and therefore, there is no increased risk of overlooking or overshadowing. The proposed heat pump may cause some noise generation, however it is only a domestic scale unit and is placed only along the elevation which is furthest from any neighbour. Due to the degrees of separation from any neighbouring residential property, the risk of undue noise pollution is deemed to be extremely small, and not grounds enough upon which to recommend refusal.

SELLP Policy 31

By providing a greater degree of insulation to the property and through the installation of a more sustainable heating source in the form of an Air Source Heat Pump will make the property substantially more thermally and energy efficient, ensuring compliance with this policy and promoting the future sustainability of this site.

Conclusion

For the reasons listed above, this application is deemed to be in accordance with Policies 1, 2, 3, 29 and 31 of the South East Lincolnshire Local Plan (2019) as well as Sections 12 and 16 of the NPPF. Therefore, the recommendation is for this application to be approved.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:

A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act

B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).

C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.
