Written Scheme of Investigation:

D065 Thurslie Cottage Dowsdale Bank PE6 0NF

19.03.2025

After consulting with the planning officer Jess Hill, and our archaeologist consulting with the Lincolnshire County Council Historic Environment Officer, it was agreed that a below ground archaeological WSI was not required and that no archaeological investigation was required. The HBR is also not required as the survey and report that was done during the planning process was sufficient to cover this requirement.

Below is the email response from Lincolnshire County Council Historic Environment Officer.

Morning Neville,

Thanks for your email.

For this case, the only requirement is an HBR Level 3.

As far as I can see on the planning portal, no WSI has been approved for this work to date, which is a condition for undertaking the HBR.

Kind regards,

Ruben Lopez Catalan

Historic Environment Officer

Lincoln DAC Archaeological Advisor

Lincolnshire County Council

County Offices, Newland, Lincoln LN1 1YL

From discussions with Jess Hill it has been agreed that this document will be sufficient to discharge this condition 3 and associated conditions 4 and 5 become unnecessary irrelevant.
