CASE OFFICER ASSESSMENT

Proposal

This is a householder application seeking permission for a rear extension and alterations at Pinfold House, 242 High Road, Whaplode.

Site Description

The is located within the defined settlement boundaries of Whaplode as outlined in the South East Lincolnshire Local Plan, 2019 (SELLP). Pinfold House is located on High Road, the main road through Whaplode from Moulton leading towards Holbeach. Previous images show the property covered in white paint across the brickwork with black beams along the front elevation, the current state shows that the paintwork has been stripped off to expose the brickwork underneath. A Public Right of Way leads to the side and rear of the property which appears to lead to an overgrown area.

History

H23-0881-02 - Extensions and alterations Approved

Consultation Responses

No comments.

Lincolnshire County Council Highways Authority

No Objections

Having given due regard to the appropriate local and national planning policy guidance (in particular the National Planning Policy Framework), Lincolnshire County Council (as Highway Authority and Lead Local Flood Authority) has concluded that the proposed development would not be expected to have an unacceptable impact upon highway safety or a severe residual cumulative impact upon the local highway network or increase surface water flood risk and therefore does not wish to object to this planning application.

Comments:

The proposal is for a rear extension & alterations to the dwelling. The alterations do not affect the parking or access therefore the proposal will not have an adverse impact on the public highway.

As Lead Local Flood Authority, Lincolnshire County Council is required to provide a statutory planning consultation response with regard to drainage and surface water flood risk on all Major applications. This application is classified as a Minor Application and it is therefore the duty of the Local Planning Authority to consider the surface water flood risk and drainage proposals for this planning application.

Key Planning Considerations

The main issues and considerations in this case are (but not limited to):

- Layout, design and impact on the character of the area
- Impact on neighbouring residents/ land users/ land use

Evaluation

Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

In this case, the adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019, forms the development plan for the District, and is the basis for decision making in South Holland. The relevant development plan policies are detailed within the report above.

The policies and provisions set out in the National Planning Policy Framework (updated 2023) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Planning Considerations

Layout, Design and Consideration of the Character and Appearance of the Area

Section 12 of the National Planning Policy Framework (December 2023) specifically relates to 'Achieving well-designed and beautiful places' and details that "The creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within Section 12 of the National Planning Policy Framework (December 2023), states that new development should function well and add to the overall quality of the area (including beyond the short term) and should be visually attractive as a result of good architecture and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing.

Development proposals should also ensure that developments create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Likewise, Policy 2 of the South East Lincolnshire Local Plan outlines sustainable development considerations for development proposals, providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, Policy 3 accords with the provisions of Section 12 of the National Planning Policy Framework, in that it requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically-designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the National Planning Policy Framework and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable.

Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

The materials used on the extension will match the existing throughout and therefore ensure it is in keeping and shall cause no visual discrepancies on the street scene and locality.

From the rear elevation the extension will protrude by around 6100mm and have a total width of 6700mm meaning it has an identical footprint to the ground floor section it shall be sited on. Furthermore, the extension will be level to the eaves and ridge of the existing dwelling allowing it to appear proportionate and acceptable despite not be subservient.

Finally, some internal alterations are proposed as part of the development, on the ground floor the kitchen shall be opened up into the existing bathroom to make the internal floor space for this room larger, the bathroom shall be relocated into the utility at the rear with the doors in this area slightly altered as well. The rear extension will act purely to make the rear most bedroom bigger and create room upstairs for a shower room on the landing. These alterations are considered to be acceptable and should harm the area.

Impact on Residential Amenity/Land Users

Paragraph 135 of the National Planning Policy Framework (December 2023) states that development should create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users; and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience.

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

The only ground floor window proposed within the extension is within the utility, this is not considered to be a habitable room and therefore no loss of privacy will occur from this. There are also no additional first floor windows within this development and therefore there is no concern for overlooking through this either.

In regard to overshadowing there could be some potential for a shadow to be cast from the extension, however this will not be significant or material due to the minimal harm it would create. It will be the same size to both the eaves and ridge of the main dwelling and will not protrude any further back than the existing layout of 246 High Road and therefore this shadow would not be a new issue when viewing the site as a whole.

As detailed above, the scale and design of the proposal is considered to be such that there would be no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. Justification has been as to why this amount of overshadowing would be seen as not material or significant due to it being similar to existing levels of overshadowing from a neighbouring property. As such, the proposal is considered to accord with the provisions of the Section 12 of the National Planning Policy Framework (December 2023), and Policies 2 and 3 of the Local Plan.

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development inside the defined settlement boundary. The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents through overlooking or overshadowing. It causes no unacceptable impact on the highway whilst conforming with the South East Lincolnshire Local Plan and the provisions of the National Planning policy Framework when viewed as a whole.

In this instance, there are no material considerations that weigh against the proposal and as such, the planning balance is in favour of the development.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:

A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act

B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).

C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Conclusion

Taking into consideration these factors, the proposal is considered to comply with Policies 2 and 3 of the South East Lincolnshire Local Plan (SELLP), 2019; in addition to the identified sections contained within the National Planning Policy Framework (NPPF) (2023). Notwithstanding the aforementioned minor conflicts, there are no significant factors in this case that would outweigh the benefits of the proposal; therefore, in considering all the matters raised above the planning balance is in favour of the proposal and the policies referred to above.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
